PREFACE.

IN compiling the third series of the HAND-BOOK AND DIRECTORY, for the Counties of SAN LUIS OBISPO, SANTA BARBARA, VENTURA, KERN, SAN BERNARDINO, LOS ANGELES, and SAN DIEGO, I have endeavored, as in the preeceding issues, to obtain and give the correct name and residence of all permanent inhabitants, noting occupation, location and post-office address of each.

Much care has been used in obtaining the statistical information, and yet it has been impossible ta avoid all errors. These, however, are comparatively few, and will lead to still more thorough and careful work hereafter.

In order to make my work equally acceptable to the merchant and farmer, the resident and the tourist, I have added a complete description of each County, City, Town, Village, Hamlet and Farming Centre ; also of the Watering Places and all points of natural attraction. For the tourist and invalid who may visit California for pleasure, or for sanitary reasons, this feature of my book, I am convinced, will be of great utility.

I desire also to inform the public that this work is one number of a series which will form, when complete, a Hand-Book and Directory of the State, engrossing the names of all residents.

I hope to have the support and patronage of the public in this undertaking, and shall always strive to merit it by making my publications valuable through their completeness and reliability.

THE PUBLISHER.

20-6169

TABLE OF CONTENTS.

General Index.

PAGE.

Descriptive of San Luis Obispo County..... 17
" " Santa Barbara County..... 91
" " Ventura County.....171
" " Kern County.....209

Prompt and courteous attention to customers, and moderate prices for goods. Consumers of above-named articles are respectfully invited to call and examine our stock before purchasing elsewhere.

AUTOMATIC PUMPS!

SOMETHING ENTIRELY NEW!

Water raised to any height and distance by compressed air. Just what every house needs, which is situated outside of cities, where they have not the convenience of running water. Ample supply of water from the well for bath-room, hot and cold-water faucets, hose for the lawn, cattle-yard, etc. The power is an 8 or 10-foot windmill. The whole machine durable; not liable to get out of order. When properly set, runs without any attention. It simply needs oiling once a month. The wind-wheel can be placed any distance from the well or spring, in order to get a good exposure to the wind, if necessary.

CALL ON OR ADDRESS,

JOSEPH E. HOLLOWAY,

31 BEALE STREET, S. F., where a Machine can be seen in Operation.

A GENERAL DESCRIPTION

OF

SAN LUIS OBISPO CO.

San Luis Obispo County is bounded on the North by Monterey County; on the South by the counties of Santa Barbara and Ventura; on the East by Kern County, and on the West by the Pacific Ocean. It has an extreme length from North to South of about seventy miles, with an average width of about sixty, giving a total area of 4,200 square miles, or 2,688,000 acres. In the vicinity of 500,000 acres are held by Spanish grants, the residue, more than 2,000,000, being government land, subject to pre-emption under existing laws, except such portions as may be in the possession of actual settlers.

The Santa Lucia range bisects the county, passing through it from North to South, making two unequal divisions, the one to the Eastward being by far the greatest, embracing nearly two-thirds of the entire area of the county. This section possesses a considerable growth of white oak, with some little pine and live oak. It is only adapted for stock-raising, its nutritious grasses, the spontaneous product of its virgin soil, rendering it very valuable for that purpose. To the Westward of the Santa Lucia range lies the smaller division, occupying the slope of the Santa Lucia and the intermediate space, sweeping away to the sea. This is the agricultural portion of the county, and here also is that large dairying interest, which has obtained for San Luis Obispo the *soubriquet* of the "cow county." It also enjoys the reputation of being the best watered portion of the State. Streams approach the valleys and lower lands from every possible spot of hill and mountain, and from mere silver threads broaden into rivulets moving along to a music as of silver bells; then swelling into mountain streams, they rush with the impetuosity of a miniature torrent, until, tumbling into the plain or valley below, with less haste and the more measured dignity of a steady-going creek, they wend their devious way to mingle with the waters of the "vasty deep."

San Luis Obispo County was organized in 1850. The assessed valuation of property in 1874 amounted to $4,505,504, and the population aggregated 9,000. The climate is very mild, there being but a slight thermometical variation throughout the year, vegetables of nearly all descriptions being successfully grown in the open air during the entire twelvemonth. There are no rapid changes of temperature, the atmosphere is perfect in its purity, and its locale is much sought as possessing all the requisites of a sanitarium. The soil is a black vegetable loam, with an underlying stratum of clay. Wheat, barley, oats, beans, corn, potatoes, and all temperate climate fruits are produced, the soil, from its exceeding richness, giving large returns to even the indifferent cultivator, such is the perfect adaptability of the climate, and so thoroughly does nature perform the work of irrigation. Near the base of the mountain range, the semi-tropical fruits are successfully cultivated. The moist lands contiguous to the creeks produce as fine sugar beets as are raised in the State.

The principal streams, by their number, attest the perfection and completeness of the natural irrigation system of this county. They are the Salinas, San Luis Obispo, Arroyo Grande, San Luis Soto, Chorro, Old Creek, Morro, Villa Creek, Torro, Santa Rosa Creek, La Cruz, San Simeon Creek, Pico Creek, Laguna Creek, San Caspojoro Creek, Suey Creek, Berros Creek, Corral de Piedra Creek, Nipomo Creek, Estrella Creek, Nacimiento Creek,

and the Santa Margarita. These are mostly small creeks, taking their names from towns which they pass in their flow, or from the valleys through which they ripple, though some are very considerable streams. The most important of these creeks, however, would lend more dignity to the name of river than do some who possess it; nor would the misnomer be so glaring as in the case of many rivers in adjacent counties, whose beds are never moistened except in carrying off the surplus after the winter's rains, and which, ere summer grows old, absolutely die of thirst.

The principal valleys of this county are the San Luis Obispo, Salinas, Santa Marguerita, Arroyo Grande, Osos, Laguna, Chorro, San Jose, Santa Rosa, Nipomo, Huasna, Cholama and Estrella.

The valley of San Luis Obispo, in which is situated the mission giving to the county and town their name, extends in a direction nearly Northwest and Southeast from Estero Bay to the Arroyo Grande, a distance of nearly twenty miles, having a width varying from three to five miles. The greater portion of this valley is good agricultural land. The Cañadas de los Osas and de las Piedras branch from this valley. The San Luis Obispo Creek, which flows through the greater portion of it, empties into the bay below the port of San Luis Obispo.

The Salinas Valley is quite an extensive agricultural district. It is irrigated by the Salinas River, which, having its source among the peaks of the Santa Lucia Mountains, lying toward the Southeast, flows for a distance of twenty-five or thirty miles through this valley, just previous to entering the county of Monterey. It has considerable good agricultural land. Many small arable valleys branch from this to the East and West.

The valley of Santa Marguerita is a broad plateau on the Northeastern side of the Santa Lucia Mountains, some twenty miles to the Northeast of San Luis Obispo. It has an elevation of some 1,200 feet above the sea, and has a much heavier growth of timber than the lower valleys, oak, pine, manzanita and other trees, peculiar to the mountain regions of the State, growing in perfection; evidencing that the air, at this elevation, contains far more moisture than in the lower districts. A branch of the Salinas River flows through this valley.

The Arroyo Grande Valley is watered by a creek of the same name. It has a considerable area, is both level and rolling, and is devoted to agricultural and stock-grazing purposes, the hills being rich with verdure, affording abundant pasturage for thousands of sheep and cattle. The agricultural lands occupy the lower levels, lying immediately along the banks of the creek.

The Osos and Laguna valleys run parallel with the Coast. The Laguna is a continuation of the Osos, they being separated only by a line of peaks almost equi-distant. The Laguna and a portion of the Corral de Piedra lying intermediate between the town and port, are termed plains, from assuming, as they do, their proportions.

The Santa Rosa is said to be the most picturesque and fertile valley in the county. It has a length of about twelve miles; is watered by the Santa Rosa Creek, which flows nearly through its centre. Corn is the principal product of the valley, which from the town of Cambria, its settlement, in the western portion of the valley to the mountain foot upon the East, is almost one continuous farm. Flowers have a spontaneous growth here, and most excellent fruits are raised.

Huasna Valley is some eight or nine miles in length by a width ranging from one-half to three-quarters of a mile. A dense growth of oak forms a living hedge upon either side for its entire length. The soil is very rich. Only a small portion of the valley has been under cultivation, it having been used for many years exclusively for the purpose of stock-grazing, and even now affords pasturage to innumerable sheep, cattle and horses. It is surrounded by lofty mountains. A small stream, bearing the same name as the valley, furnishes the water supply. Branching from the main valley are many of smaller area, bearing the same name as the main valley. The Flora here is wonderfully beautiful and abundant. It dots the hillsides with gold, crimson and azure, and sprinkles the verdure of the lower plain with the variegated hues of a fairy landscape.

Cholama Valley is twenty-five miles in length, with a width of from four to five miles. The soil is a light sandy loam. Stock-raising is the principal resource, all the mountain and

foot-hill lands being devoted to this industry. Considerable cottonwood and oak is scattered throughout its area, and a small quantity of hay is produced.

The valley of Estrella is also devoted principally to the raising of stock, sheep having the preference. The soil is a sandy loam. The valley has a length of seventy-five miles, with an average width of two. The mountains and hills furnish an abundance of pasturage. Cottonwood and oak trees abound in the valley, and hay is raised to some extent. The Salinas River flows through it, furnishing an abundance of water. Two mountains ranges lie between it and the coast, some twenty-three miles distant. No fogs visit the valley. The atmosphere is pure and the climate conducive to good health. The thermometer indicates about 78° average.

San Luis Obispo County has twenty-four school districts, with a school census aggregating above 1,600. Agriculture and the interest of stock-raising exist side by side, and we regret our utter inability to obtain accurate statistics which would allow of an intelligent comparison between the two. In this county, in 1867, only 12,000 acres were under cultivation.

LANDS.

Much land is held for sale in the various parts of the county, on most reasonable terms. The Steele Bros. are offering 40,000 acres, in tracts of any size. This land is of various grades, comprising every variety of soil, from the best hill grazing to the richest bottom lands, suitable for producing all kinds of grain, vegetables, hops, sugar beets, tobacco and fruits. It includes improved farms, dairy ranches, and unimproved lands, and is susceptible of irrigation at but slight expense, much of it being magnificently watered by never-failing brooks, abounding in trout, small lakes and springs. Live oak, willow and cottonwood timber is abundant. This property is situated five miles South of San Luis Obispo, on the Santa Barbara Stage Road, and nine miles from San Luis Obispo Landing, one of the best harbors upon the coast, possessing as good shipping accommodations as any port between San Francisco and San Diego. The improved lands and dairy farms will be sold fully stocked and equipped, if preferred.

Messrs. Dana Bros. are holding for sale 37,000 acres of choice land, situated twenty-four miles South of the town of San Luis Obispo. The soil of more than one-half of this large tract is black adobe, the remainder being a sandy loam, suitable for the production of cereals, potatoes, beans, and all kinds of vegetables. It is well irrigated by running streams, which never fail; also by springs. On that portion of the tract which has a sandy soil, water can be obtained by digging to a depth of from fifteen to twenty feet. A large lagoon is also on the property. These lands have been chiefly used for stock-grazing, there being at present on the property flocks aggregating 16,000 sheep, 2,500 head of cattle, and 100 horses. During the dryest year the best of crops can be produced. Any portion of this land can be purchased on reasonable terms, at from $20 to $100 per acre; 17,000 acres are valley land, 17,300 acres hill or grazing land, with 3,000 acres of timber.

There is a large public domain in San Luis Obispo County, comprising lands of every description, subject to pre-emption.

THE DAIRY INTEREST

Of San Luis Obispo is very large, no county in the State being better adapted for this pursuit. The largest dairy interests are in the vicinity of Cambria, and distributed along the coast nearly the entire length of the county. Dairies in the neighborhood of Cambria have produced, in one season, 200 lbs. of butter on an average for each cow. The demand for cheese manufactured here is steady, much of it going to the Eastern States, China and Mexico.

The inducements offered by this county to persons wishing to engage in this industry, are manifold. Pasturage is abundant throughout the year, and is obtainable at low rates and on easy terms, while cows can be leased at from $10 to $12 per annum. Profits are large, butter searcely ever commanding less than 30c. per lb., the range being from 25c. to 75c. per lb.

San Luis Obispo County has four flour mills, with an aggregate capacity of 30,000 barrels per annum.

The Arroyo Grande Mills are located on the Arroyo Grande Creek, from which they derive their power, three miles from the town of that name, and twelve miles South of San Luis

Obispo. They are owned by Messrs. Branch Bros.; manufacture a very superior article of flour, and have a capacity of thirty barrels per day. Corn-meal, middlings and ground feed are also among the manufactures of this mill, which has, beside, an extensive grist trade among the farmers of the surrounding country. The proprietors intend adding to the efficiency of their operations soon, by the introduction of improved machinery, and also propose erecting extensive warehouses for the storage of grain.

The Chorro Mill, owned and conducted by Messrs. Pollard & James, are located three miles distant from San Luis Obispo, on Chorro Creek. The creek furnishes a fine motive power, the fall being 190 feet. The wheel in use is a turbine. Twenty-five barrels per day are ground, the article comparing favorably in quality with any brand made upon the coast.

Two miles East from San Luis Obispo is another water-power mill, owned by Mr. C. Sumner; while one and one-half miles North from Cambria is the large steam mill of Messrs. Leffingwell & Sons.

MINERAL RESOURCES.

San Luis Obispo County numbers among its mineral resources neither gold nor silver mines, though it enjoys the reputation of possessing the richest quicksilver deposits on the Pacific Coast.

The Sunderland Quicksilver Mining Co., the mine being better known as the Santa Cruz, is located Northeast from Cambria eighteen miles. It was incorporated September 14th, 1874, under its present name, the capital stock being $10,000,000, divided into 100,000 shares. This company owns and is operating upon 102 acres of land, the result of the consolodization of the "Santa Cruz," 2,200 feet; "San Lorenzo," 2,000 feet; "European," 1,500 feet; "Arago," 1,500 feet, and "Cuvier," 1,000. Considerable work has been done in the mine, with very satisfactory results. Four tunnels penetrate the hill. The ledge shows croppings for over 3,000 feet in length, and, in one place, over 400 feet wide. All of the tunnels are being worked in ore assaying from one-quarter to two per cent. The ore is reduced in a very perfect Riotte & Luckhardt Furnace, with a capacity of twenty tons per diem; the walls are built of dressed freestone, lined within with fire-brick; attached are three large iron condensers. A twelve-horse power engine runs the blower connected with the furnace. The fire is under perfect control, and the fumes are conveyed to the condensers without any loss. A narrow-gauge road, 1240 feet in length, connects the mine with the furnace, for the transportation of the ore. The supply of wood and water is convenient and inexhaustible, water being conducted to the tank which supplies the furnace through 6,000 feet of pipe.

The Oceanic Mine is situated in the Santa Rosa Valley, some seven miles from the ocean, and about five miles from the village of Cambria. The mine has an elevation of 1,000 feet above the level of the ocean. The ledge lies East and West, varying from a perpendicular to an incline of about fifteen degrees, dipping toward the North. The vein matter is from twelve to twenty feet wide. The cinnabar obtained here reduces fourteen per cent. of quicksilver per ton, having an average marketable value of $150 to the ton. The reduction furnace has a capacity of twenty tons per diem. The Oceanic is an incorporated company, with a capital of $6,000,000, divided into 60,000 shares. Many of the stock-holders are well known business men of San Francisco. Three mines were engulphed in the formation of this, viz.: the "Sulphur Spring," "Bristol and Morse," and the "Second."

The Mahoney Mine is within one mile of the Sunderland. It has been quite well prospected, and has grown into high favor. It has but a small furnace, with the capacity of four tons per day. Many other mines and prospects exist throughout the county, but all of less importance than the ones noticed. Among them are the "Keystone" and "Quien Sabe;" the latter was recently bonded for a large amount, and promises to develop into a very rich property. It is nine miles North of Cambria.

ASPHALTUM.

On the South fork of the Arroyo Grande Creek, on a ranch of 4,500 acres, owned by Mr. F. Branch, is a fine asphaltum bed, covering an area of full an half mile. It has not been sufficiently worked to ascertain its depth. Tar springs are numerous throughout this bed, two of the

largest having a diameter of from twenty to thirty feet, with an unascertainable depth. These have at times acted as a capital bear trap, and have also overwhelmed many more domestic animals, while in search of water. From one of the tar springs in this locality issues a gas with a hissing noise, as of steam escaping from a small vent. On the application of a match it burns readily, though having but slight illuminating power. An abandoned oil well is in this vicinity, the abandonment being due to a breakage of the tools, or their sticking in some mud vein, and the inability of the operators to extract them. A very good show of heavy oil is upon the water at the well top. The asphaltum found here is being taken to San Luis Obispo for the various uses to which it is adapted. The mine has not been worked to any great extent, as the Steele Bros. have one much nearer town. Another bed is in a deep canyon about two miles from that owned by Mr Branch, not so extensive, but producing a better quality of this product.

In the Southern part of the county is an extensive ledge of alabaster, of superior quality, for the working of which preparations have been made.

This county has three mineral springs, which have become quite celebrated as places of pleasure resort, and for the medicinal benefit, too, derivable from the waters.

Newsom's White Sulphur Springs are located fourteen miles South from San Luis Obispo, twelve miles from the steamer landing, and two miles from the Santa Barbara stage station, Arroyo Grande. The springs are situated in a mountain canyon about 600 feet in width. The locality is abundant in heavy undergrowth. The principal spring throws off a sufficient quantity of water to irrigate land at the distance of a mile below. Its temperature is 100° fahrenheit. It holds in solution sulphur, iron and magnesia. Its application is both external and internal, a cure being rapid and certain in cases of paralysis, rheumatism, billiousness, debility, and all diseases of the nerves and skin. At a distance of thirty feet is a spring of soft cold water; about 100 yards further, two of cold water impregnated with iron, one containing sulphur, and one asphaltum. The mean temperature in this little mountain valley is about 65°. Fish and game abound. The mountain sides are heavily wooded with live oak of dense growth, whose foliage is perrennial.

An hotel will soon be completed large enough to entertain, in connection with the cottages, one hundred guests, with excellent camping facilities, unlimited in extent. Mr. Newsom proposes to bring from the Arroyo Grande Creek, by means of a race, sufficient water to run a 20-horse power engine all the year. This water-power he offers to anyone who will establish a manufacturing interest, he taking the value of land and water interest in stock of the institution.

The Paso Robles Hot Springs are situated in an oak grove, thirty miles East of San Luis Obispo. Neither pains nor expense have been spared to render the springs an attractive and comfortable resort. Thousands of people visit these springs from all portions of the State and United States. Messrs. Blackburn & James are the proprietors.

The Pecho Warm Springs are situated fifteen miles Northwest from San Luis Obispo, and two from the coast, in a deep canyon. The temperature of the water is 96°; its properties being about the same as those of Newsom's White Sulphur Springs. The locality has been but little improved, arising from the difficulty experienced in obtaining a title to the property, they being located on a Spanish grant.

The principal towns of the county are: San Luis Obispo, Morro, Cambria, Cambria Landing, Cayucos, San Simeon, Old Creek, Arroyo Grande, Avila, San Marcos and San Miguel.

SAN LUIS OBISPO,

The county seat, and principal town of the county, occupies the grounds of the old mission, founded by the monks of the order of St. Francis, September 1st, 1772. From it both town and county derive their name. The mission was laid out and built in the usual form of a quadrangle; the work being performed by Indians, rude and unskilled, to be sure, but directed and supplemented by the accomplished Fathers. The material used was such as the immediate neighborhood afforded, and if both labor and material were crude, the one was well adapted for service, the other well and honestly performed, as the present existence of the buildings in a well preserved state fully attest, after the wear and tear of more than a century. The mission had a season of

almost unexampled prosperity. Its flocks and herds roamed over miles upon miles of verdant pasturage; improvement, religious, educational and financial, moved hand in hand to what bade fair to be a peaceful, happy future of pastoral quiet, comfort and independence. The soil was tilled to the extent rendered necessary by home consumption. Orchards and vineyards were planted, and everything was done to administer to the welfare of the mission, which persistent toil, guided by energy and intelligence could do. But although the missions, coeval with this, did for a term of years labor sedulously for the religious advancement and civilization of the savage aborigines of the land, and although the system has many profound admirers, it must be admitted that their energies as evangelists had suffered a severe diminution previous to the blow aimed at the prosperity of the missions by the Mexican Congress of 1826. After the settlement of the country by the missionaries, sixty years of undisturbed quiet offered an opportunity in which to demonstrate the efficiency of their schemes for the civilization of the native. Their increasing wealth rendered them unfit for their previous missionary labors, and the moral, religious and physical condition of the Indian became a matter of less consideration with them than the cultivation of their boundless acres, and the increase of their vast flocks and herds. Their acession to wealth was by no gradual progression. Deriving their labor from the natives who received no largess but the food and clothing their own labor produced, with the virgin pasturage of the limitless hills for their flocks and herds, in a climate so tempered, even to the shorn lamb, as but to develop rapid physical growth, how could they do otherwise than wax thrifty and rich, without the lapse of years, usually necessary for such a metamorphosis?

After founding twenty-one missions along the coast, following its configuration on their Northward journey, they appear to have used no exertions in behalf of the Indians of the interior. That they were left to their fate is by no means doubtful, as proof is wanting that any effort was ever made to explore the interior, either to learn whether the country was inhabitable, or the inhabitant worthy of being included in those promises which they were sent forth to proclaim in the name of God. The last mission was founded in 1823, ten years previous to the promulgation of secularization by the Mexican Congress. A complete chain of missions stretched from San Diego to San Francisco, the boundaries of whose lands interlocking, as effectually excluded the settler, as though the entire coast were the fortified wall of a vast principality. The more so since their decisions were absolute, they being the only authority, temporal or spiritual, of which the land could boast.

From 1800 to 1822, the style of living and the revenues of these lords of the missions was in a measure regal; their church services had degenerated into a mere religious formality; and disguised beneath their priestly robes was the substantial farmer, the prosperous produce speculator, and the opulent stock-raiser.

In 1831, Indians to the number of 18,683 were domesticated at the various missions.

Although this system had given evidences of decay many years previous, its doom was irrevocably sealed by the overthrow of the Spanish dominion in Mexico, in 1822. The precautions taken by the Fathers tending to prevent the settlement of the territory by white emigrants, was a fatal injury to their cause, leaving them totally bereft of all means of defense, under the changing order of things, and the introduction of a new government; as in the newly framed constitution of the Mexican Republic, population was the basis upon which rested representation, and the missions aggregating but a few white inhabitants, Upper California was denied representation as a State, and declared a territory with a representative in Congress, but even he denied the privilege of a vote. The law enacted by the Mexican Congress of 1826, deprived the Fathers of both their lands and the labor of the Indians, cut off their salaries, and appropriated the "Pious Fund" to the uses of the Republic.

Then the errors of the system became fully apparent. The Fathers had simply upheld the Indian, without teaching him to walk alone; they had maintained him in a condition of independence, without showing him how to attain or maintain the position by his own undirected efforts. As a result, when deprived of the guidance to which they had so long been accustomed, they became an enemy, more to be apprehended by the few white settlers, than the savage hordes of the interior, and the Mexican Congress was induced, within two years from the enaction of the law regarding the missions, to repeal that portion relating to the natives, and they were allowed to

return to the missions. Their labor, however, was not as efficient as formerly, and they were controlled with far more difficulty.

In the year 1833, a law was enacted by Congress for the entire abolition of the missions, with the removal of the missionaries, and a division of the lands and cattle among the settlers and natives. The law was repealed before it could be carried into effect, by Santa Ana, who suceeeded to power through the aid of the church party. The succeeding years, up to 1840, when Congress assumed control of the missions, was a stormy, trying period for the Fathers. Mexico was distracted by internal political broils and convulsions, and the Fathers were stripped of their privileges one after another by the various parties succeeding to the government control. In 1845, the remaining missions were sold at auction to the highest bidder.

In the year 1825, the mission of San Luis Obispo had 87,000 cattle, 2,000 tame horses, 3,500 mares, 3,700 mules, and 72,000 sheep. One of the Fathers of the mission carried with him, in 1828, when he left for Spain, $100,000.

In reviewing the history of this period we cannot but admire the zeal which led these Fathers to so meritorious an undertaking in a new and unexplored country, where they had every reason to expect but a succession of hardships and a period of deprivation extending probably over a long term of years. We cannot but glorify them for the unexampled courage and determination with which they leveled every obstacle which barred their progress, and the firmness with which they marched on to a glorious and complete victory. Yet must we deplore the after usurpation of high, noble resolves, and pure, worthy motives, by so mean a successor as love of wealth, and lust for power.

The town of San Luis Obispo occupies a nook at one extremity of the valley of the same name, nine miles from the coast, and on the stage road leading from the terminus of the S. P. R. R. through the coast counties to Los Angeles. It was incorporated some five years since, the corporate limits including an area of four square miles. Its suburbs are fast being lost in the improvements which are being rapidly carried forward. Its population numbers in the vicinity of 2,000. Two streams pass through it, constantly supplied by the numerous springs and rivulets flowing down from the Santa Lucia Range. One, the Stenner Creek, flows in from the North, through the fertile fields of the Chorro Valley, and in the lower portion of the town forms a coalition with San Luis Creek, which rises near the Summit of the Santa Marguerita Pass, and flows immediately through the town, touching the boundary of the old mission garden, now the site of beautiful and tasteful residences. The thermometer indicates an average of 65° fahrenheit.

There are three private and three public schools in the town, with an aggregate attendance of about five hundred pupils. Teachers are carefully selected, rigidly examined, and adequately recompensed.

The town has four hotels and six livery stables, and commands a large trade from both directions upon the coast, and for at least one hundred miles toward the interior. A large amount of capital is invested in merchandising, and there are quite a number of wealthy and responsible mercantile houses.

The San Luis Obispo Bank is a very prosperous institution, with a paid-up cash capital of $200,000. It has been paying monthly dividends of one and one-half per cent.

Water Works, very creditable to the young city, have been erected at a cost of $40,000. The reservoir is built of stone, and is situated upon a sidehill, 160 feet above the town, giving a pressure which would enable it to render effective service during a conflagration. The supply is derived from a branch of San Luis Creek, and is conveyed in an open flume for two miles, around the side of a neighboring mountain, before reaching the reservoir. The distributing pipes, taking the water from the reservoir, have a diameter of eleven inches. The mains, laid through the streets, are seven inches in diameter, with which the smaller supply pipes connect. There are now upwards of five miles of street mains, to which the company is still constantly adding. The capacity of the works will allow of the distribution of 600,000 gallons daily.

Quite a number of handsome churches assist in beautifying the town. The Methodist, Methodist Episcopal, Episcopal and Catholic denominations have church edifices, which are both neat in appearance and comfortable in their interior arrangement. The observance of the Sabbath is very general in this community. To the stranger who strolls along the streets upon this

day, the fact is very apparent, and the contrast offered between it and the average California town is very marked.

The Masonic fraternity, also the Odd Fellows, have lodges here, as well as the Good Templars, and a recently organized lodge of Knights of Pythias. Two Literary Clubs hold weekly sessions, and a well organized Grange meets fortnightly.

In some portions of the town, those most improved, the streets are well shaded. The character of the private residences has changed for the better during a year or two past, and many fine buildings grace the surroundings. All those now in process of erection are vastly superior to the ones erected in times past. Door yards are beautified, too, by flowers of all descriptions, gladdening the senses with their brilliancy of coloring, and the fragrance of their delicious perfumes.

The rapid growth of this town has necessitated, from time to time, the addition of more territory. The old mission garden was first used to supply this need, some two years since, and was divided into lots which were quickly sold.

The Phillips Addition of fifty acres is situated about 900 yards East of the Court House. The tract is somewhat elevated in position, is sheltered from the coast winds, and commands a fine view of the surrounding country. Palm street cuts through the entire tract. Water from the city water works will be supplied to every portion of the ground. The situation as a site for residences could not be better chosen. Mr. Phillips has erected here, as his private dwelling, one of the finest buildings, of that class, in the town. The lots are 50x150 feet. Through this tract will be opened an avenue 100 feet in width.

One mile from the business center is the Beebe and Phillips Addition of 400 acres, subdivided into five and ten-acre lots.

West from the Court House, three-quarters of a mile, is the Laguna Tract, comprising 1,200 acres. The soil of this tract is a vegetable loam, of exceeding richness, suitable for the most diverse cultivation. The lots each include ten acres.

The Coast Line Stage arrives and departs daily, North and South. Coaches run between the town and harbor, which is nine miles distant. The stage between San Luis Obispo and Cambria, by way of Morro, Old Creek and Cayucos, runs three times per week, each way.

The Telegraph Line from San Francisco to Santa Barbara, is laid by way of San Luis Obispo, and grants unreserved and rapid communication with all portions of the land. An independent line connects the town with the harbor.

San Luis Obispo has one paper, the weekly *Tribune*.

MORRO

Is situated on the Eastern shore of a bay of the same name, on a nearly level table land of light, sandy soil, with a gradual slope to the West and South. Good soft water can be obtained by sinking wells to a moderate depth. There is a perfect absence of trees of natural growth, but those of any species or variety, transplanted, become thrifty growers in this rich soil, as is evidenced by the fine appearance of those which, from time to time, have been planted by the resident townspeople. The soil, though light, has not yet failed to return fair crops, the crop of 1873 being better than usual, and excelling the crops of many portions of the county, possessing heavier soil. Grain of all kinds, all descriptions of fruits, and potatoes, are cultivated to advantage.

The town site was laid out in 1870, but owing to a lack of capital, there has not been as much growth or improvement as those most interested in the place could wish.

The situation of the town is one of rare beauty. A perfect view of the ocean is obtained for fifteen miles Northwest and Southwest, vessels being apparent while yet a long distance out at sea. The chief attraction is the grand old rock, from which the early Spanish settlers named the bay, and from which also the town is named. Morro Rock lies midway in the entrance to Morro Bay, dividing the channel. It lifts up an area of barren rock, equal to about eighty acres, 600 feet above the level of the surrounding waters. It forms a very prominent land mark. Vessels of light draft have no difficulty in entering Morro Bay, where they can discharge their freights at a wharf, completely protected from damage by the elements. The bay is the port of entry for a

prosperous back country, and it is not at all unreasonable to anticipate for Morro a bustling future. It has a wharf, warehouse, two stores, hotel, and a population of about 100.

CAMBRIA,

Thirty-two miles North of San Luis Obispo, is situated in Santa Rosa Valley. It is a town settled and inhabited by Americans. The adobe structure has no existence here. A school building, of generous proportions, crowns one of the loftiest eminences in the town. The school session is maintained through about eight months in the year. A grove of sugar pine of natural growth occupies the grounds surrounding the school. The region of country contiguous to Cambria is very irregular, being uneven, and broken by numerous hills. Its resources are stock-raising and dairying.

The town contains two hotels, several dry goods and grocery stores, drug stores, saloons, butcher shop, blacksmith and harness shop, and one livery stable. It numbers among its population 300 inhabitants. There are two sawmills in this vicinity, one located in town, the other distant one and one-half miles North. A scarcity of choice timber, close at hand, has materially lessened their operations.

CAMBRIA LANDING is two miles West from the town. A commodious warehouse and substantial wharf have been constructed here, allowing even large vessels to lie alongside, at all stages of the tide. This port will eventually receive a large amount of freight, the product of the mines working in the vicinity, as well as the agricultural production of a large circuit.

CAYUCOS,

Of which Old Creek is the post office, is situated in the Northeastern bight of Estero Bay, twenty-two miles Southwest from Paso Robles Hot Springs, and fourteen miles East from Cambria. The landing was located in 1869, by James Cass, who still resides there. The principal resource of the place is dairying. The dairy product shipped during the month of February, 1875, amounted to 35,000 lbs. The soil of the locality is adobe. From Point Buchon to Point Pinos, near Cambria, the hill side on the shore of Estero Bay which faces the South, is said to be among the most fertile land in the county. The dairying is conducted principally by Swiss. A large amount of cheese is manufactured here. This is a school district, although a very young settlement. The town has been laid out and many lots staked off on the Moro y Cayucos Rancho. Mr. Cass has erected warehouses, suitable for the storage of grain, and has perfected arrangements with Messrs. Goodall, Nelson & Perkins, for a regular visit of one of their steamers every eight days. Every improvement which can facilitate the unloading and shipping of freight has been made, and additions will be made to the wharf and warehouses as often as may be necessary to meet the demands of an increasing business.

SAN SIMEON

Is located upon the bay of the same name. The village comprises two stores, hotel, saloon and warehouse. The settlement is a small one, distant from San Luis Obispo forty-four miles Northward. Whale-fishing is prosecuted by a company formed for the purpose, and the port has gained some notoriety for the opportunities it affords in this direction. The harbor is considered a good one, although lighters are required in loading and discharging cargoes. San Simeon is ten miles above the village of Cambria.

OLD CREEK

Has no settlement to speak of; only a wayside house of entertainment, post office and saloon. It is situated in a beautiful valley, as fertile as it is picturesque. Old Creek flows through the valley, furnishing water adequate for all the needs of cultivation. Cayucos is only one mile distant.

SAN MIGUEL,

Whose more recent name is San Marcos, commands the ancient site of the mission of San Miguel, founded July 25th, 1797.

The present settlement is situated on the bank of the Salinas River, thirty-eight miles North of San Luis Obispo, and about 40 miles from the headwaters of the Salinas.

The town comprises two hotels, two stores, two saloons, one blacksmith and wagon shop, with a population of about fifty persons. Two mountain ranges separate it from the ocean, which is twenty-three miles distant. It has daily communication with Soledad (Monterey County,) by stage, also with San Luis Obispo. Merchandise is freighted over from San Luis Obispo Landing by wagons, the distance being forty-seven miles. It is in the center of a large stock-raising district.

The old mission church and accompanying buildings yet exist in a comparatively sound condition, the outer walls exposing the ravages of time. There is considerable government land in this vicinity, awaiting those who are seeking homesteads.

ARROYO GRANDE

Is a small settlement, some three or four years old. It lies about twelve miles South of San Luis Obispo, on the West bank of the Arroyo Grande Creek. It is also on the stage road leading through to Santa Barbara. Arroyo Grande has two hotels, two stores, two saloons, and a wagon and blacksmith shop. It has also a good school. The resources of the contiguous country are pastoral and agricultural. Much fallow arable land adjoins the creek upon its either bank. The land farther back is rolling, its surface being broken into hills, which are utilized by the stock-raiser.

The Arroyo Grande Creek possesses admirable facilities for manufacturing purposes, facilities which some shrewd capitalist will some day take advantage of. There is a fall of about 100 feet to the mile, and 150-horse power, at least, is running to waste, simply for the want of application. The Arroyo Grand Flour Mills, elsewhere mentioned, and owned by Branch Bros., is the only manufacturing establishment on the stream. This is a living stream, and the power derivable from it would be a perpetual one.

The banks of this stream are quite heavily wooded, which furnish an endless supply of timber, consisting of cottonwood, sycamore, box elder and willow.

Excellent locations can be found here for the establishment of mills of any description, or for a tannery. A woolen or beet sugar factory especially would find this an advantageous situation, from the heavy wool-producing interest, not of this section alone, but of the entire county, and from the adaptability of the soil and climate to the production of the sugar beet, which were grown at the rate of fifty tons per acre one season, on the property of Dana Bros., in the Southern portion of the county.

The Newsom White Sulphur Springs are but three miles from the village of Arroyo Grande.

West of the village, two miles, the beach forms one of the most enjoyable drives on the coast. It is both firm and hard, with a length of thirteen miles.

AVILA

is the name of a new town laid out by the Avila Bros. It is identical with that of the settlement at San Luis Obispo Landing.

The site is a very advantageous one, and quite a town is expected to spring up here, not without reason, as its advantages are manifold.

The climate is very uniform, the western sea breezes being entirely broken by a huge promontory, which extends far into the sea. On the Northeast and South it is equally as well protected by hills, which almost environ it on the landward side. None of the extremes of heat and cold are felt here, which are so prevalent in coast towns.

The town is well laid out, having five broad streets, eighty feet in width, the main one called San Luis, after the county seat.

The projectors of the settlement are inviting and inducing settlers by using extreme generosity in the disposition of their lots.

The harbor is of sufficient size to accommodate a large fleet; it is safe from most winds, with an utter absence of breezes from off land. Within the bay about one and one-half miles, is a small cove of great depth, protected by bluffs, which offers absolute safety to vessels of large tonnage and unusual draft, at all seasons of the year. A good wharf has been erected here by Mr. John Harford, a respected and enterprising resident of San Luis Obispo, who is also constructing a narrow-guage railroad between this point and the county seat. Several miles of the road have

been graded, bridges and trestle-works have been built for the spanning of chasms, and all this effected by the meagre capital and uncompromising energy and courage of one man, who in view of the obstacles to be overcome, could find no one to assist in bearing the burdens of his enterprise. One mile and one-quarter of the road has been in operation for some time, transporting freight to the wharf from the warehouse of Mr. Harford, located at about that distance inland. This gentleman's pluck and foresight will result in the possession of a piece of property which will eventually enrich him. The coast steamers of Messrs. Goodall, Nelson & Perkins call here regularly.

The future prosperity of San Luis Obispo County is fully assured. The rich resources of her agricultural wealth; the immensity of her wool-producing interest; the magnitude of her inexhaustible mineral treasures; the certain income from the legitimate direction of her large dairying industry; and her possibilities as a manufacturing center, when her vast resources in that direction are fully utilized; all set the seal of unmistakable, perfect and permanent success upon its future.

The rich fertility of its fields, with a salubrity of climate so perfectly adapted to lead both vegetable and physical growth to an expression of its most perfect maturity, is attracting an immigration which will speedily develop its every interest.

Its magnificent valleys, under the influence of the sturdy arm of this new comer, will be made to pay a tribute to production, the richness of which has been undreamed of as within the realms of its possibilities.

The flocks and herds which now crop the luxuriant herbage of its hills, as compared with those of the future, are but as a fleck upon an unclouded sky to the mass of vapors which enshroud it.

Within the bowels of its loftiest peaks, will delve, with the energies of giants, the thousands who will be tempted hither by the luring hope of a brighter fortune.

The homestead of the settler will dot every available portion of the magnificent public domain of 2,000,000 acres.

The rushing murmur of the creeks will be drowned by the noisy clatter of ponderous machinery, to which the strong-armed mechanic will give direction.

The product of the then trebly enhanced dairies will be transported to all quarters of the globe, and this county named among those of Herkimer, Orange, Oneida, and Westchester, for the similarity, excellence and magnitude of its manufacture. Long ere this, too, the question of rapid transportation will have been satisfactorily settled, and over the iron rails will thunder, at their prodigious speed, the trains which bear to the markets of the world, the fruits of a labor magnificently compensated.

Then peace and happiness will be the only dwellers upon its mountains. Joy clothed in plenty will be hidden in every recess of the hills, and the grain-clad valleys will be alone inhabited by the rich, the prosperous and the happy.

LOUIS EMERY PAGE. FELIX EPHRAM GRAVEL.

PAGE & GRAVEL,

—MANUFACTURERS OF—

Carriages and Wagons

OF ALL KINDS, OF THE BEST MATERIAL.

THEY ALSO KEEP ON HAND A COMPLETE STOCK OF

Carriages, Buggies, Light Spring

AND HEAVY WAGONS

OF THEIR OWN MAKE, WHICH THEY WARRANT IN EVERY RESPECT.

They have determined to sell their work at prices as low as the inferior and worthless work that is frequently being palmed off upon the community in Los Angeles and elsewhere. Call and see the best assortment of Carriages and Buggies ever offered in Los Angeles. All Carriages and Buggies manufactured by us are fitted with Page's Celebrated Patent Adjustable

SPRING LAZYBACK, SO WELL ADAPTED TO COMFORT.

TOURISTS IN SEARCH OF HEALTH,

OR PLEASURE,

WILL FIND BOTH BY VISITING

THE OJAI VALLEY,

IN VENTURA COUNTY, 15 MILES NORTH OF SAN BUENAVENTURA, AND 30 MILES EAST OF SANTA BARBARA.

This beautiful valley is shut in by high mountain ranges, which prevent the rough sea breezes and fogs from reaching it.

Its elevation above the sea level renders the air dry and bracing, and its climate is peculiarly adapted to those suffering from

Asthma, Bronchitis, and all Pulmonary Complaints.

Having recently purchased the Hotel at

NORDHOFF,

IN THE CENTRE OF THIS VALLEY,

I have completely refitted and furnished it in the best manner, and the house is now open for the reception of guests. Invalids and others will find comfortably furnished sunny rooms, with open fires, and a table supplied with the best the market affords.

Parties taken to the celebrated Matlija Hot Springs, the Petroleum Wells, and other points of interest.

The Valley and neighboring mountain canyons abound with game of all kinds, and the mountain streams are stocked with trout.

Cottages will be rented to parties desiring more accommodation than can be had in the Hotel.

C. P. WIGGIN, Proprietor.

C. P. WIGGIN. MORTIMER CARR.

WIGGIN & CARR,

DEALERS IN

REAL ESTATE.

MONEY LOANED ON APPROVED SECURITIES.

Agency of the

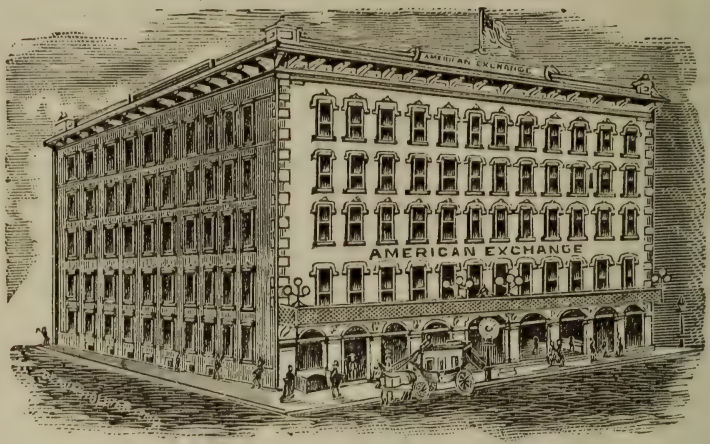

FIREMEN'S FUND INSURANCE CO. OF CALIFORNIA

Information relating to the climate, resources, and attractions of the OJAI VALLEY and vicinity, freely furnished on application. Call on or address,

C. P. WIGGIN, Nordhoff, Ventura County, - - Cal.

AMERICAN EXCHANGE HOTEL,

SAN FRANCISCO.

This old and popular Hotel, which has for the last twenty-four years extended to the traveling public a cordial welcome and the comfort of a home, and so favorably known to old Californians and the traveling public, that it requires no comment on our part further than to say that the BRYAN BROS., who also are old Californians, and know how to cater to the wants of the traveling public, have taken the full proprietorship of the above hotel, and shall leave nothing undone to make this hotel second to none in San Francisco, for

COMFORT, GOOD LIVING AND CLEANLINESS.

Our sole aim shall be to the comfort and welfare of our guests; our table is furnished with the best the market affords; the house has been thoroughly renovated and newly furnished throughout; two hundred rooms well ventilated.

Gentlemanly and obliging clerks, and clean and attentive waiters, will always be found in our hotel.

The hotel is the most centrally located of any in the city, being in the centre of the business portion of the city; the Street Cars pass the door every two minutes to all parts of the city; our Coach, with Red Lights, will be at the railroad depots and wharfs to convey passengers to the house free of charge; our Runners wear Silver Badges on left breast, with the name of the house on.

BEWARE OF OTHER RUNNERS.

OUR PRICES ARE FROM $1.50 TO $2.00 PER DAY.

GIVE US A CALL, AND JUDGE FOR YOURSELVES.

WM. and THOS. BRYAN, Proprietors.

WILLIAM M. LANDRUM. JAMES. M. RODGERS.

LANDRUM & RODGERS,

THE PIONEER BREEDERS AND FIRST IMPORTERS OF

Angora Goats & Cotswold Sheep,

On the Pacific Coast,

Have Constantly on Hand the Largest and Finest Flocks in America, of Pure Breeds and Grades.

WATSONVILLE, - - SANTA CRUZ COUNTY.

This Cut is from a Photograph of Imported NELLY, 9 years old; won the Sweepstakes Prize at the California State Fair in 1873, and sheared 7 lbs. of fine Mohair. We have others nearly as good. Parties owning Mountain Lands will do well to see our Flocks and investigate the ANGORA GOAT BUSINESS.

SEND FOR CIRCULARS.

We price everything according to merit.

SAN FRANCISCO.

MRS. H. A. MOORE,

The Great Scientific Hair Producer,

NO. 523 KEARNY STREET, ROOMS NOS. 4 & 5, S. F.

Mrs. H. A. Moore would announce to ladies and gentlemen who desire the personal adornment of a fine suit of hair, that she has opened parlors for its express treatment. They are emphatically assured she possesses the skill to produce a full, flowing crop of hair on all stages of baldness. A few treatments will convince the most skeptical; this is no exaggeration. No mineral or damaging substances used. I have in my parlors photographs of well known citizens, exhibiting the contrast before and after treatment, which can be seen by those desiring it. No better evidence can be furnished. When they are seen, doubt vanishes. Preparations sent to all parts of the country.

BAY HOTEL

AND

RESTAURANT

Avila.

THE PUBLIC is informed that the undersigned has opened, at the People's Landing, the above designated Hotel, Restaurant, and Saloon, where he will endeavor to cater to the taste and comfort of his friends and the public at large, to the best of his ability.

Daily Evening Post

THE POPULAR JOURNAL OF SAN FRANCISCO.

THE EVENING POST is published every afternoon (Sundays excepted) at 2 P. M., 3:30 P. M., and 4:30 P. M., thus furnishing the latest news up to the time of departure of each mail.

The EVENING POST is now in the fourth year of its publication, and has attained a larger circulation than all the other Evening Papers on the Coast combined.

The POST publishes the best and fullest Telegraphic Reports of any San Francisco Paper, while in the fullness and reliability of its Local Reports, the freshness and vigor of its Editorials, and the reliability of its Stock Articles, it is confessedly ahead of all its contemporaries.

Its Market Reports are prepared by Special Reporters, and it contains full details of all Commercial Intelligence, while it is the only Afternoon Paper in San Francisco publishing the

COMPLETE SALES OF THE STOCK BOARD,

A special Telegraphic Wire connecting the Stock Exchange with its office, by means of which sales are instantaneously reported up to the latest minute.

TERMS.

The POST is served by Carriers in San Francisco, Oakland, Sacramento and other large towns for 12½ cents per week, and is sent by mail for $5 per year.

Owing to the time of departure of the mails, the POST reaches many parts of the State with twelve hours later news than any other San Francisco Paper.

EXCELSIOR IMPROVED WIND-MILL.

The opinion has become too prevalent that wind-mills are not to be relied upon, either to withstand violent storms, or to perform their work in very light winds. Such opinion is doubtless true in regard to many, perhaps a majority, of mills; nevertheless, it is an injustice to the few mechanics who have made the wind-power a study and a specialty for many years, to class their productions with those of a larger number, who pretend to be wind-mill makers, but who comparatively have little experience, or practical knowledge of the business.

We were the inventors, more than ten years ago, of the single, cross-vane wind-mill. The demand for them gradually increased until they have come into more general use than any other mills. Of course, other parties were induced to make an imitation of them, and some to make use of its name, "EXCELSIOR." A man is desirous of purchasing a wind-mill, and starts in pursuit of the factory. Presently he sees a sign "WIND-MILLS," walks in and inquires, "is this the place where they make the EXCELSIOR WIND-MILL?" The answer is, "Yes, sir; O, yes, we make them," or words to that effect, and the gentleman really thinks he is purchasing an EXCELSIOR. We have recently caused the name to be registered in the U. S. Patent Office as our Trade Mark, and hereby caution all persons not to make unlawful use of the same.

The EXCELSIOR was awarded the first and cash premium at the Cal. State Agricultural Fair in 1872—the only time ever exhibited there. It has taken a larger number of premiums at the Mechanics' Institute Fairs in San Francisco, than any other wind-mill.

The EXCELSIOR is adjustable, and self-regulating, is very substantially built, and with reasonable care will last twenty or twenty-five years. Its construction is simple, and can be easily erected by those who are not mechanics. They will run in lighter winds than any other wind-mill, and violent storms will seldom injure them. They are always under perfect control, a child being able to operate them.

The cut, engraved from a photograph—represents their style and appearance. They are made in twelve sizes, from twelve feet to forty feet diameter of wheel. A larger stock and assortment kept on hand than can be found in the State. Every mill fully guaranteed. Address,

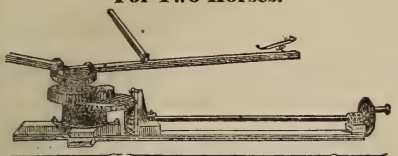

EXCELSIOR WIND-MILL WORKS,

211 AND 213 MISSION STREET, SAN FRANCISCO.

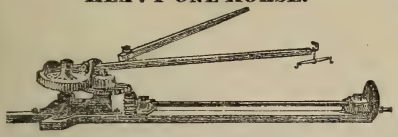

ATWOOD & BODWELL, Pro's.

HORSE-POWERS.

LITTLE GIANT
TRIPLE GEARS
AND DOUBLE LEVERS,
For Two Horses.

EXCELSIOR
DOUBLE-GEARED
HEAVY ONE-HORSE.

FARMERS'
SINGLE-GEARED,
FOR ONE HORSE.

These machines are complete in every detail, and possess every improvement and advantage that can be combined in Sweep Horse-Powers. They have an advantage over *any* other horse power in this market, viz: our application of the patent rubber draw-spring, which prevents any breakage of the gears by any sudden start, or jumping, or fractiousness of the horse; and when used for pumping, materially lessens the jerking motion on the lever, caused by the change of motion of the piston.

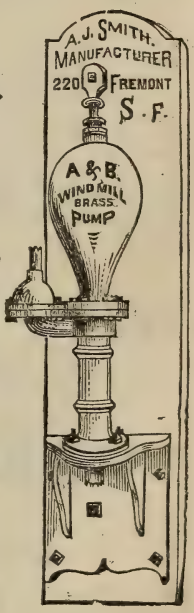

We use the external gears in these machines. They are universally used on all kinds of geared machinery where internal gears can be dispensed with, being more easily lubricated and cleaned, and less liable to break the periphery of the wheels.

These Powers have dust-proof and self-oiling journals; are simple, strong, durable and cheap. Having succeeded in making them much superior to those which have been imported from the East, we have virtually stopped their importation.

We furnish with these powers, when desired, any size of belt wheels, or style, or weight of balance wheels, combined with a movable crank-pin for pumping, and counter-balance when needed.

ATWOOD & BODWELL'S

Windmill Brass Pumps.

These Pumps were designed especially for Windmill work.

They are superior to any pump of Eastern make, both in weight, strength, and inside finish.

They are constructed in the simplest form of a lift and force pump, and are not liable to get out of order.

ALL KINDS OF PIPING, FITTINGS, Etc.

Furnished at Lowest Rates. Also Water Tanks, of all Sizes.

A GENERAL DESCRIPTION

OF

SANTA BARBARA CO.

SANTA BARBARA COUNTY is bounded on the North by San Luis Obispo County; on the South by the Santa Barbara Channel; West by the Pacific Ocean; and on the East by the County of Ventura.

It was organized in 1850, but until recently has made small advancement in an agricultural direction, her entire territory being devoted to grazing purposes, development in other departments having only recently been inaugurated.

AREA.

The area of Santa Barbara County, including the islands of Santa Rosa, San Miguel, Santa Cruz and Santa Barbara, with the main land, amounts to about 3,200 square miles, or 2,048,000 acres.

THE ASSESSED VALUATION

Of property for 1874 reaches the sum of $6,010,309.

RESOURCES.

Its resources are agricultural, grazing, and mining. Agriculture, embracing also horticulture, at present leads the industries, and is the principal resource. Many of the great previously undivided grants have been broken up into smaller sections, and from pastoral uses have been turned over to the cultivator. Much of the land forming these great tracts has been unproductive, and even unused for grazing, for years. The soil and climate of the county possess all the advantages required for purposes of cultivation. Fruits indigenous to the tropics, and to the cold, frozen climes of the North, thrive side by side, mingling the delicate perfume of their blossoms and vieing with each other in the realization of the deepest blush.

The grazing interest of Santa Barbara County is probably greater than that of any other portion of the State.

Col. Hollister, the pioneer American engaged in this industry, in 1853 came overland from Ohio, with a flock of 3,000 sheep. He had visited the State a year previous; had been struck with the advantages offered in the direction of sheep-raising by a country where pasturage was perennial, and where, favored by a temperature of unchanging mildness, shelter was rendered unnecessary, and returned to Ohio for the necessary stock with which to establish himself in this new production, in a new country. The flock of 3,000 sheep, with which he reached the State, was a joint stock, of which his individual portion, after the partition, amounted to 800. The partition was effected in San Bernardino County, by way of which they brought in their flocks. From here Col. Hollister drove his flock to Monterey County, passing up the coast through San Bernardino, Los Angeles, Santa Barbara, and San Luis Obispo. Starting with this small beginning, he has persistently led this industry, with a result the perfect success of which is attested by the present magnitude of his possessions. The interests of which he is now the head and front represent millions of dollars, in flocks and real estate. At one time he was the proprietor of flocks aggregating 80,000 head, while his right to the title of a landed proprietor may be said to be vested in one peice of real estate which will survey over one hundred and fifty thousand acres. This forms but one item in the schedule of this gentleman's vast possessions, he owning, privately and conjointly with his numerous partners, both real estate and flocks in various portions of the country.

Its mineral resources, if not large, are varied. Quicksilver, asphaltum and petroleum are the mineral products delved for.

Two ranges of mountains cross the county from West to East, the most Northerly range being the Sierra San Rafael; the one toward the South, the Sierra Santa Ynez. Their altitudes are in the vicinity of from 4,000 to 6,000 feet.

The country between these ranges forms a series of low, irregular hills with scarcely any level land.

Santa Barbara is the only county of the State possessing so large a Southern coast line. This topographical peculiarity is thought to exert great influence upon the climate and productions not only of this county, but also of those to the South and East of it.

North of Point Concepcion, which forms the Northern extremity of the county, the entire coast is subject to cold winds which sweep inland from the Northwest, laden with fogs, while during the winter violent rain-storms prevail from the South. South of the point there is an utter absence of fog, the atmosphere being much drier and warmer than to the North. It seldom rains from May to November, frost is almost unknown, and snow rarely visits the loftiest mountains.

Extending from Point Concepcion in an Easterly direction, to the Southward of the Santa Ynez Mountains, is a belt of land stretching away for one hundred miles along the sea shore, of a width of about three miles, which in advantages of soil and climate will bear favorable comparison with any portion of the State. The climate is almost tropical; the soil possessing unusual richness, with adaptibilities so varied as to ensure perfect maturity for the most dissimilar growths.

There is but little timber in the county, if we except the oak willow and sycamore, which grow in the valleys or upon the plains which skirt the mountains, even the loftiest of which are covered with a heavy growth of nutritious grasses and wild oats, which luxuriate throughout the winter and spring, furnishing the best of pasturage for sheep and cattle through the entire year.

The mountains are much lower in the Western portions of the county than in the Eastern, where occurs the conjunction of the Sierra Nevadas with the coast range. The loftiest peak where this conjunction culminates is Mount Pinos, in the Western portion of Ventura, the adjoining county upon the West, recently formed from Santa Barbara County. Mount Pinos towers to an altitude of nearly 7,500 feet above the sea-level.

WATER COURSES.

Santa Barbara County has no great number of water courses, although the supply they furnish would prove sufficiently abundant if properly utilized. Little activity seems to have been displayed with the view of supplementing nature, or preparing against emergencies by husbanding a water supply upon which the agriculturist might rely in time of need. Irrigating ditches are as rare in this county as they are plentiful in counties adjacent, and the limpid element is allowed to run its idle course, uninterrupted, to the sea, thus wasting that which, through the medium of intersecting ditches and conveniently located reservoirs, might render prosperous many a dry season, in spite of nature's failing to fill her implied compact with the cultivator of the soil. The Santa Ynez River traverses the county for more than one hundred miles, from East to West, having its outlet in the Pacific Ocean at Santa Lucia. For ten miles from its outlet, it has more the character of a creek than a river.

The Cuyamas, or Santa Maria, has its source in a canyon of the Sierra Nevadas, near the Northeastern boundary of Santa Barbara County; the Northwestern boundary of the county of Ventura, and the extreme Southern boundary of San Luis Obispo County. It is a considerable stream, and forms the Northern boundary of the county for more than one hundred miles, extending Northward of Point Sal nearly as far as Fort Tejon. Guadalupe Lagoon forms its outlet.

These streams have many tributary creeks, which maintain a greater or less flow of water during the entire year. In the summer season the water is very low, scarcely any streams maintaining a flow but for a short distance after leaving the mountains on their way to the sea.

VALLEY LAND.

Santa Barbara County has not the area of level land to be found in Los Angeles County. Her valleys are extremely fertile, as are the terraces reaching back and encroaching upon the territory of her hills.

In the Santa Ynez Valley is located the old mission of that name, the buildings of which are still in good preservation, the old bell still serving the purpose to which it was dedicated so many years since, of calling to the worship of God the denizens of its neighborhood.

The valley possesses this topographical feature in common with all upon this portion of the coast. It forms a succession of terraces, marking the uprisal of the land, the result of the geological processes of the present era.

The lowest terrace, of which this valley has three, is at an elevation of twenty-five feet above the river bed; the one occupying the medium position is twenty feet higher than the lowest, while the upper one is still fifty feet above the central one, giving it an extreme height of ninety-five feet from the level of the river.

These terraces were undoubtedly all cut or formed by the river, at widely different periods.

On the south side of the Santa Ynez Mountains the coast line forms a terrace, extending from Santa Barbara to the Gaviota Pass, some eighty feet above the ocean level.

PRINCIPAL VALLIES.

The principal valleys of the county are the Santa Maria, Santa Barbara Carpenteria, and Lompoc.

We append some figures giving industrial and other statistics for the year 1874, from a report to the Surveyor General of the State by the County Assessor.

In that year (1874) Santa Barbara County had of wheat 15,717 acres, 168,229 bushels; barley, 8,474 acres, making 286,365 bushels; corn, 1,094 acres, 43,496 bushels; beans, 476 acres, 11,360 bushels; potatoes, 133 acres, 332 tons; hay, 1,017 acres, 6,108 tons. The number of acres under cultivation, 28,390; enclosed, 26,773.

The number of sheep in the county amounted to 431,486; giving a wool product of 1,725,-944 lbs.

The number of cows amounted to 4,603; calves, 3,717; beef cattle, 5,371; neat cattle, 13,-598; horses, 4,076; mules, 369, and 1,394 hogs.

Of trees in bearing there were 6,423 apple; 1,025 peach; 3,045 pear; 802 plum; 145 cherry; 226 nectarine; 425 quince; 1,824 apricot; 1,373 fig; 1,489 lemon; 3,856 orange; 2,056 olive; 106 prune; 1,083 mulberry; 38,311 almond, and 10,274 walnut.

Grape vines, 213,984. The wine product amounted to 2,325 gallons.

One distillery was running, producing of brandy 1,100 gallons; one brewery, producing 35,000 gals. beer.

One grist mill was in the county, deriving its power from steam, which turned out during that year 1,500 bbls. of flour, and ground 1,700 bushels of corn.

The value of real estate in the county in 1874 was $3,452,433. Improvements, $768,469. Personal property, $1,789,407. Total valuation of real and personal property in the county, $6,-010,309. The poll-tax collected reached the sum of $3,000, while the number of registered voters amounted to 2,345.

The United States census of 1870 gave the population of the county as 7,784. This census was taken previous to the division of the county, for the purpose of forming the new county of Ventura.

The estimated population of the County of Santa Barbara in 1874 was 11,000.

TOWNS.

The principal towns of Santa Barbara County are Santa Barbara, Central City, Carpenteria, Guadalupe, La Gaviota, La Graciosa, La Patera, Las Cruces, Lompoc, Montecito, and Santa Ynez.

SANTA BARBARA,

The county seat, occupies a position on the Southern coast line, about the centre of the county. It is in the vicinity of four hundred and forty miles South of the State capital. It occupies the land formerly tenanted by one of the early missions founded in 1780, whose buildings even yet occupy an eminence about one mile and an half from the beach. The eminence has an eleva-

ion of above two hundred feet, and commands a fine view of the adjacent country and sea coast. The church, which is still in a good state of preservation, is a long, low, dazzlingly white building, with a frontage of about three hundred feet. From this old mission the town and county derive their name.

The harbor is an open roadstead, exposed to winds from the Southward, but realizing some safety from the sea-weed which grows in enormous quantities between the waters of the harbor and the open deep, affording an excellent substitute, and answering in nearly all essential respects the purpose of an effectual breakwater.

A thoroughly serviceable wharf extends 2,000 feet into the water, allowing close moorage to sailing vessels and steamers, which receive and discharge cargo immediately upon the wharf, thus avoiding the trouble, labor and expense concomitant upon lightering.

The assessed valuation of property in the town of Santa Barbara is $2,500,000. The rate of taxation for the years 1875–6 is 75 cents per $100. Its population will aggregate about 4,000.

The streets are laid out in squares, the intermediate blocks measuring 450 feet each way. There are four public plazas, and the streets are sixty feet in width, excepting the two main thoroughfares, State and Carrillo streets, each of which have a breadth of eighty feet.

Water is furnished by the Santa Barbara Water Company, from sources formerly controlled by the mission.

Gas of good quality is furnished by a company established for that purpose.

A good fire department has been organized, possessing one Hook and Ladder Company, as a much needed auxiliary.

During the past year only fifty delinquents were arraigned before the criminal courts.

Among the notable buildings of the town are The Arlington House (nearly completed), Santa Barbara College, Lobero's Theater, City Hall, Occidental Hotel, Morris House, Odd Fellows' Hall, as well as many of the church edifices.

The Arlington House occupies an entire block, with a frontage of 160 feet on State street, and a frontage of 120 feet on each of two side streets. The building is forty-four feet in height to the roof, with a surmounting tower still thirty-six feet higher. It will contain 100 rooms, fifty of which contain marble mantels and fire-places. The dining room is detached, and in the rear of the main building, the kitchen also standing independent of the other buildings.

A verandah surrounds the whole building. The front entrance opens to a circular enclosure. All modern improvements have been introduced, and the entire appointments of the establishment are perfect.

It is owned by a joint stock company, composed entirely of residents of Santa Barbara. The expense attached to the enterprise, independent of upholstering and otherwise furnishing it, amounts to $80,000.

The buildings of the Santa Barbara College are among the best in the State. The Odd Fellows' building is a fine piece of work, and cost in its erection $26,000. The City Hall, built last year, is an ornament to the town. The finest church structure in the town, and one of the best in this portion of the State, is one just completed by the Presbyterian Church. It is built of wood, its steeple reaching upward to the height of one hundred and thirty feet.

NEWSPAPERS.

Santa Barbara has two daily papers, the *Press* and *News*, and one weekly, the *Index*. The dailies also publish weekly editions. These well-conducted and ably-edited papers have a large circulation, with a good advertising patronage.

SCHOOLS.

Santa Barbara has a good public school system. One school building is large and roomy, well conducted, provided with efficient teachers. Its departments are graded. Four small buildings in various portions of the town accommodate the less advanced classes. Two two-story school-houses are in process of erection in the upper portion of the town.

CHURCHES.

The Baptist, Presbyterian, Congregational, Methodist South, Episcopal and Catholic denominations are represented here, not as in some communities, with church edifices alone, but,

what in California is rare, with actual worshippers. The good old New England element has carried its Plymouth Rock ideas, somewhat modified, into this locality, and the party who cannot sit through one hour and an half of nasal pulpit utterences, without putting in practice that stale old theatrical dodge of "going out to see a man," had better remain in San Francisco, go to Los Angeles, or strike a mining camp; he can never hope to wedge in his stake in this community.

PUBLIC CONVEYANCES.

Goodall, Nelson & Perkins S. S. leave Santa Barbara three times per week, each way.

The stages of the Coast Line Stage Company arrive daily from San Francisco and Los Angeles.

Four miles East of Santa Barbara, in the Montecito, are the nurseries of Dana B. Clark. All kinds of tropical, semi-tropical, and temperate climate fruit trees are here in fullest stock, finest varieties, and every stage of growth. Mr. Clark makes a specialty of introducing and experimenting with new and rare species of fruit and ornamental trees, shrubs and plants. He propagates very largely, and has beautiful grounds, well adapted for this purpose.

To the West of Santa Barbara, seven miles, Joseph Sexton is conducting the Santa Barbara Nursery. He is cultivating fruit trees of every species and variety, as well as hardy evergreen shrubbery, pot plants, and all descriptions of ornamental growth. He has also a depot, for sale of his goods, in Santa Barbara.

CARPENTERIA

Is situated twelve miles east of Santa Barbara. It is a thriving settlement, occupying a valley of the same name containing about sixteen square miles, or in the vicinity of 100,000 acres of land, either altogether level or slightly undulating. A great portion of it is covered with heavy oak forests. Agricultural land here is thought to be equally as arable as any in the State, irrigation being unnecessary and frosts unknown. Corn, barley and beans are the chief products.

Fruit-raising has become a prominent feature in the cultivation of this district, the semi-tropical fruits being largely grown, as well as the almond and walnut. One of the residents of the settlement, Mr. Ormstead, has upon his place the largest asphaltum beds upon the coast. The population of the settlement amounts to about 200. Land is held at $100 per acre, and at this price is considered cheap. The settlement has also three schools, two churches, three stores, two blacksmith and wagon shops, an express and post office, and grange.

In the upper portion of the settlement is the landing, a very essential point in a producing community, as affording the means of marketing their goods without outside aid or intervention. The wharf property is owned by Messrs. N. D. and F. Smith. The wharf is 600 feet in length, with a warehouse capacity of 15,000 sacks. It is the intention to extend the wharf during the present year, giving it an extreme length of one thousand feet. From this point was shipped during 1874, of corn and barley, 40,000 sacks ; of beans, 12,000 sacks ; together with 4,000 sacks potatoes. They also shipped 500,000 feet of lumber from their yard, which they conduct in connection with the wharf at this point.

MONTECITO

Is four miles from Santa Barbara, and the same distance from Carpenteria; it is on the road to the Hot Springs, and only two miles distant therefrom. It is a very beautiful spot, and appears to much advantage when viewed from the Hot Springs, lying so high above it. Its attractions are scarcely apparent as viewed from the stage road, while merely passing through it. Quite a number of very wealthy gentlemen have made their homes here, erected costly dwellings, and surrounded themselves with every purchaseable elegance. One gentlemen, Col. Bond, has devoted himself to obtaining and perfecting every known exotic growth, and upon his grounds, probably more nearly than upon any spot of earth, center the four quarters of the globe. Here are grouped the results of nature's work in every clime, as expressed in tree, in shrub, in flower, or in fruit. This, too, is the vicinity noted for the magnitude of its celebrated grape vine, grown from a grape vine switch, which only in its eighty-fourth year began to languish, and after it had attained a circumference of nearly four and one-half feet. Because it was thought to have about finished its earthly career, it was determined to exhume it and place it on exhibition at the centennial, as an instance of California abnormal growth.

HOT SULPHUR SPRINGS.

The Santa Barbara Hot Sulphur Springs lie to the Eastward of Santa Barbara, six miles, at the head of a mountain canyon, 1,450 feet above tide-water level. Here are twenty-two hot springs, varying in temperature from 60° to 122°. Although the waters have been examined by chemists and physicians, no analysis has ever been made. They contain in solution both black and white sulphur, and are also heavily charged with iron. The springs were discovered by Mr. Wilbur Curtiss, in 1855, since which time he has resided on the premises, he having immediately taken the proper steps to secure the property, after having satisfactorily tested the curative powers of the water in his own person, he being at that time in poor health. A four-horse stage runs daily between the Springs and Santa Barbara. Visitors will find the best of hotel accommodations here, with courteous and polite attention. A number of cottages are scattered about, well finished and furnished. The medicinal value of the waters is undoubted, and many are the remarkable cures performed through their agency.

GUADALUPE

Is the principal town of the Santa Maria Valley, one of the largest and richest sections of the county. This town is about seventy miles Northwest of Santa Barbara, and is a thriving, fast-growing settlement. It numbers in the vicinity of 400 inhabitants; has six stores, two hotels, a livery stable, two meat markets, two blacksmith shops, harness and paint shop, and a newly erected Odd Fellows' Hall; a good school, with an average attendance of sixty pupils; two churches, with another soon to be erected. A weekly paper, *The Guadalupe Weekly Telegraph*, is published here, and is one of the most enterprising and best edited of the interior weeklies.

Point Sal is the landing for this region. Messrs. Harriman & Co. have a wharf here 1,250 feet in length, with a depth of water varying from 20 to 35 feet. Point Sal is ten miles distant from Guadalupe, eight miles from Central City, seventeen miles from Lompoc, and fifteen miles from La Graciosa.

The shipments of grain from this point during the past year amounted to 110,000 sacks, and 3,000 bales wool. Three warehouses of large capacity are located here, belonging to the above named firm. Harriman & Co. have a large stock of lumber at this point, as well as a large yard at Guadalupe, their sales for last year having amounted to 1,500,000 feet.

La Graciosa and Las Cruces are small villages, respectively sixty-eight and forty-three miles northwest from Santa Barbara. Both are post office towns.

La Gaviota is a small settlement also, forty miles northwest from Santa Barbara. Las Cruces is its post office town. At Gaviota Landing some of the smaller sailing vessels and coast steamers call to leave freight for the upper portion of the valley, and bear to market the product of the neighborhood.

LOMPOC.

This new town is distant from Santa Barbara forty miles, in a northwesterly direction. It was founded by a colony, which possessed 33,000 acres of land, divided and sold in tracts of from five to eighty acres, in November, 1874. It is situated inland but a short distance from Point Concepcion, on the Santa Ynez River and Miguelito Creek. The colony is founded on strict temperance principles. A good hotel, the Lompoc House, has recently been opened here. One paper is published, the *Weekly Record*.

CENTRAL CITY.

A short distance to the eastward of Guadalupe is the present town of Central City, more generally known as Santa Maria. It is situated on the banks of the Santa Maria River, which irrigates the fertile valley of the same name. It has about 300 inhabitants, one of the best hotels in the interior of the State, three stores, two blacksmith shops, a livery stable, harness shop, and several of those "'round-the-corner" establishments, where the thirsty are provided for and the *weary* are at rest—under the table.

Central City is a most prosperous, enterprising little town, occupying one of the best portions of the county.

Santa Barbara

Hot Sulphur Springs.

This famous SANITARIUM, and celebrated HEALTH and PLEASURE RESORT, is six miles from Santa Barbara, in the mountains, at an altitude of 1450 feet above tide-water; affording one of the grandest views in the world, especially from POINT LOOK OUT, near the Springs, overlooking the city of Santa Barbara, Carpenteria, Montecito, and the beautiful Valley beneath. The grand old Pacific, with her islands, and the shipping lie before you. But greater by far is the value of these waters to health! Here are twenty-two Springs, spouting forth their waters from the rocks, varying in temperature from 60° to 122°. Chemists from all parts of the world have examined them, and unite in pronouncing them of a superior and unrivaled medicinal character. Some of the most wonderful cures on record have here been performed simply by their use.

Invalids, Tourists and Pleasure-seekers should visit them. Good accommodations and all city comforts offered.

Board, including Steam and Hot Water Baths, $2 50 to $3 00 per day.

A Daily Four-Horse Stage runs to and from Santa Barbara, from Wells, Fargo's Express Office. Fare $1.00 each way; Ely Rundell, Agent.

WILBUR CURTISS, - - Proprietor.

F. P. BACON,

——PROPRIETOR OF——

Marengo Ranche

SITUATED SEVEN MILES NORTH-EAST FROM LOS ANGELES,

CONTAINING 8000 ACRES.

VINEYARD, 40 ACRES. **ORCHARDS, 150 ACRES.**

There are in good growth, 1,500 Orange Trees, 800 Walnut Trees, besides Lemon, Almond, Peach, Pear, Apple and Fig Trees, in full and best varieties.

The water facilities grant a supply greater than is necessary to satisfy all demands, whether for irrigating or domestic purposes. The springs from which the water is derived are situated at an elevation, giving sufficient fall to allow of its conduct to any portion of the property.

Extensive Timber Lands, with the best qualities of timber, 300 acres of White Oak, Live Oak, Red Oak and Black Oak.

Elevation above the sea level, one thousand feet. The soil varies in character from a sandy and gravelly loam to a black adobe, while at this altitude and in this locality frost is positively unknown.

WIND-MILL.

THE ECONOMY WIND-MILL

Embraces all the latest improvements, and is the most simple combination of parts that can be imagined, as well as the most ornamental of any low-priced mill ever invented.

The Farmer can set these Machines up and put them in successful operation without the aid of skilled and expensive labor.

Patented June 11th, 1872.

Our Mills are in general use by the great Railroad Companies on the Pacific Coast, and give the most perfect satisfaction, as can be proved by reference.

The manufacture of Pumping Machinery has been our specialty for the past twenty-seven years. We are the Pioneer and largest manufacturer in this line on the Pacific Coast, and we say, without the least fear of successful contradiction, that for BEAUTY, SIMPLICITY, CONVENIENCE, DURABILTY AND ECONOMY, these Machines are UNEQUALLED.

We have received all the FIRST PREMIUMS awarded by the MECHANICS' INSTITUTE of this City, in our line, for the past nine years, and every time previous when we exhibited in competition with others, for which we have our Diplomas to show.

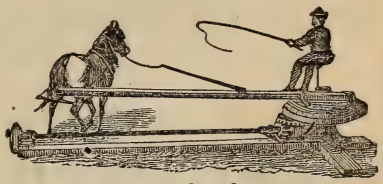

W. I. TUSTIN, Patentee.

W. I. TUSTIN'S PATENT

First Premium Wind-Mills and Horse-Powers

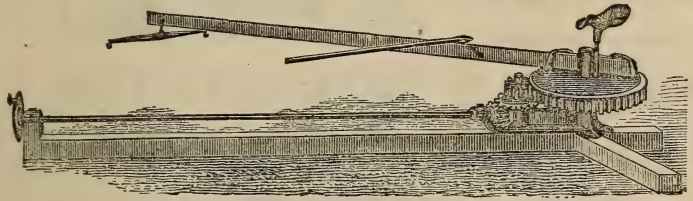

The Simplicity and Perfection of these Machines is the result of 27 years' experience in California.

THE "ECONOMY" AT WORK.

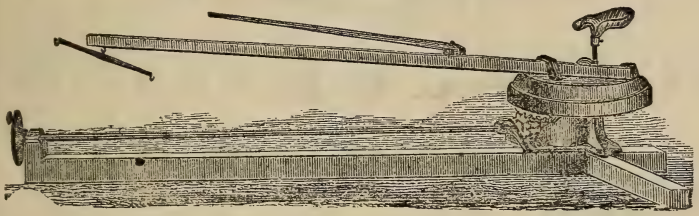

These powers are designed for all purposes, such as pumping water for irrigation, watering stock, chopping feed, churning, sawing wood, running machinery for manufacturing, mechanical or other purposes.

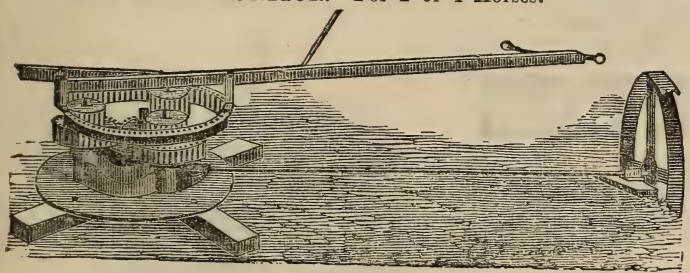

THE ECLIPSE.—For 1 Horse.

A GENERAL DESCRIPTION

OF

VENTURA COUNTY.

VENTURA COUNTY is bounded on the North by San Luis Obispo and Kern counties; on the South and Southwest by the Pacific Ocean; on the East by the county of Los Angeles; and on the West by Santa Barbara County and the Pacific Ocean. It includes also within its boundaries the islands of Anacapa and San Nicholas. It has an

AREA,

Of from twelve to sixteen hundred square miles, or, in acres, from 768,000 to 1,024,000. The

POPULATION

Of the county reaches in the aggregate about 7,000.

It originally formed the eastern portion of Santa Barbara County. A division was, however, made in 1873, and Ventura was made a county under a new and separate organization, in January of that year.

In an air line it is two hundred and sixty miles from San Francisco; by ocean, three hundred. In 1874 the

ASSESSED

Valuation of its property was $3,000,000, since which time, to the present, the increase is thought to be fully $800,000.

Ventura is very mountainous; the range in the northeastern portion of the county rises to a height of from five thousand to six thousand feet. The principal ranges are the Sierras, San Rafael, Santa Ynez, Santa Monica and Santa Susanna. The hilly portion of the county abounds in grasses, which grow luxuriantly and are of an exceedingly nutritious nature. This forms admirable pasturage for vast flocks of sheep, and herds of cattle. The grazing interest here is exceedingly large in consequence of the hilly nature of the greater portion of the county. There are 250,000 sheep in the county.

THE RESOURCES

Of the county are both agricultural and mineral.

ITS PRINCIPAL VALLEYS

Are the Simi, Las Posas, Santa Clara, Pleasant and Ojai.

Simi Valley lies at the foot of the Santa Susanna Mountains, entering from Los Angeles. It is nine miles long. A succession of small valleys, all forming the Simi Ranche, owned by Col. Thos. A. Scott, the great railway operator, connect Simi with Las Posas Valley. All this section is rich in agricultural promise. It has the watershed of the Santa Susanna range; frost and snow visit only the highest elevations of the loftiest mountains; and deep plowing seems to answer admirably as a substitute for irrigation beyond that which nature furnishes.

Las Posas is a very rich agricultural valley, ten miles in length, opening into the valley *par excellence* of the county, and one of the most fertile and promising valleys in the State, viz.: Santa Clara Valley, which lies along the Santa Clara River, has an extreme length of about fifty miles, and, at its widest point, would probably measure twenty miles; at some places, however, it is quite narrow. On the south side of the river is a plain about ten miles square, which is especially noted for the productive nature of its soil, and its agricultural wealth. It is but little developed, and offers an opportunity to those desiring to become producers, or to those who are looking for land investments. Prices range here from ten dollars upward. Artificial irrigation is by no means a necessity, as crops of all kinds mature without that aid, yet in no portion of the State can artesian water be obtained at as small an expense of labor and money as here. There are a large number of wells, at least thirty, many of which maintain a continued flow, through seven-inch pipe, to a height of from twelve to twenty feet above the surface.

Still south, separated from this plain by only a small ridge of hills, lies Pleasant Valley, containing about eight thousand acres of land. Land is well improved in this valley; agriculture is a thriving industry, and the settlement a very prosperous one. It is said to contain the finest schoolhouse in the county outside of San Buenaventura.

Throughout the entire valley of Santa Clara, a fertile soil and mild climate combine to render its productiveness all that could be desired. As before stated, good farming precludes the need of irrigation, and crops seldom or never fail. Fruits of all kinds thrive, and apples, especially, are very superior in flavor to those grown in most sections of the country.

A remarkable fact regarding fruit trees here is the rapidity with which they come into bearing. In a letter written to the "Resources of California," the writer says he saw peach trees, less than a year old from the bud, in blossom.

The yield of corn in this valley is very large, the average being from sixty to eighty bushels to the acre, with a single instance of a yield, on a thirty-five acre piece, of one hundred and forty bushels per acre.

Potatoes and barley return very large yields, also; and the wheat crop, at the extremity of the valley most distant from the ocean fogs, proves a very certain one.

Flax is grown for the seed, the fibre being rejected.

Hog-raising forms one of the important business interests of this locality, the hogs being turned into the barley fields, to gain a subsistence until the maturity of the corn crop.

The yield of barley is something so enormous in the same fruitful valley we have been considering, that people called upon to record these statistics scarcely hope to gain credence. But wonderful as these statements appear, their truth is attested by people of known probity. One fact, easily substantiated, is, that from a field in the Santa Clara Valley, of four hundred and two acres, there was taken one hundred and six bushels of barley per acre.

Along the borders of the valley is an abundance of wood.

Oranges are grown successfully, and beans yield thirty dollars per acre.

Experiments are being made with the different varieties of Eastern apples, with a view of testing their growing qualities.

Fully 512,000 acres of the land of this county is either adapted to all the needs of cultivation, or is well timbered; it is distributed in the proportion of one-twentieth timber land and nineteen-twentieths arable.

The timber is white-oak, live-oak, and sycamore. In these varieties, the canyon and the country bordering the streams is very abundant.

The principal ranches of the county are the "Coloñia," "Ojai," "Santa Ana," "Cañada Larga," "Guadalasaa," "Las Posas," "Simi" and "Conejo." In addition to these there is considerable government land and much private land, besides the lands of the so-termed, "Ex Mission Company," whose property lies adjacent to, and in fact surrounds the city of San Buenaventura. The Coloñia Ranch covers an immense tract of splendid valley land, located about mid-way of the county. It produces about 500,000 centals of grain annually, principally barley, though wheat and corn are also cultivated to some extent, as well as other cereals. In the spring of the year dense fogs prevail, rendering this section, to a great extent, independent of rain, and it is

stated, upon the best of authority, that it could absolutely dispense with rain-water if every farmer would only provide for emergencies, by sinking a well upon his premises, a matter of small moment in this locality where artesian water is so easy of obtainance. Farmers on these lands are generally successful, though nearly all are "renters," rendering progress less rapid than would be the case did each farmer till his own soil. Appreciating the many advantages of the location, however, all who are able are purchasing, terms being made easy, only a small advance payment being required, long credit being granted for the balance. Those not devoting themselves to growing grain find profitable employment in sheep and hog-raising, which has proved wonderfully remumerative. All of the stock products of the ranchos "Colonia," "Conejo," "Las Posas," "Simi," and "Calleguas," find their way to market through the town of Hueneme, which has large warehouses, and one of the best wharfs on the southern coast, giving to shippers all the accommodations and advantages connected with transportation.

THE PRINCIPAL TOWNS

Of Ventura County are San Buenaventura, Hueneme, Nordhoff, Santa Paula, Saticoy and Scenega.

In the county are fifteen Schools. Wine and Brandy manufactories are established in the valleys of Tapo, Cumolas, Santa Clara and Calleguas.

MINERAL.

Both placer and quartz diggings exist in this county, the gold of both making gratifying assays. Cinnabar croppings have also been discovered. Gypsum has been found in the Ojai valley, in large quantities, as well as a vein of potter's clay, near the beach. Large deposits of asphaltum are found along all the small streams. It finds a local use in serving as roofing, and a great amount of it is reduced, and shipped to San Francisco. The difficulty and cost of transportation prevent the asphaltum beds from being worked to their full capacity. They will prove a great source of wealth when this difficulty is removed. This county has also an immense mountain of nearly pure sulphur.

The principal water courses of the county are the Ventura, Santa Clara, Santa Paula, Sespe and San Antonio Rivers.

MANUFACTURING.

Ventura has no manufacturing interest, compared with what she might sustain. Wood and crude petroleum are easily attainable and cheap, wood being sold at $5,00 per cord. Water with any desired fall can be obtained, land is cheap, and a market for nearly everything which could result from the establishment of such interests, could be found upon the spot.

LANDS.

Good improved lands can be purchased in this county at very reasonable figures. Mr. Thomas R. Bard, whose interest in the welfare of the county induced him to furnish us with much information we would otherwise have found it difficult to obtain, is offering splendid tracts of farming and grazing lands, well supplied with water from artesian wells, on terms which may almost be dictated by the purchaser. These tracts range from 10,000 acres to 100, and are for sale in large or small parcels, as may best suit the purchaser, at the lowest of prices, and on the most easy terms. People desiring to locate should look through the magnificent valleys of Ventura, acquaint themselves with the accuracy of the statements regarding its fertility, and before purchasing should consult Mr. Bard, who is ready to offer every inducement to fix the preference of immigrants in his locality. Mr. Bard is a resident of Hueneme, situate in the finest valley of Ventura, which is also one of the garden valleys of the State.

SAN BUENAVENTURA,

The county seat of Ventura County, was organized March 10th, 1866, and at the present time has

a population of about 2,000. It communicates with San Francisco by water, through the medium of the Goodall, Nelson & Perkins S. S. Line. With Santa Barbara and Los Angeles, the communication is by daily stage, each way; with Bakersfield, Kern County, connecting with S. P. R. R. by tri-weekly stage; by tri-weekly stage with both Nordhoff and Hueneme; and by daily, with Santa Paula. San Buenaventura is situated in the northern portion of the valley of the same name. The Ventura River empties into the ocean at this point. It was formerly a Spanish village, adobe built, ruinous, filthy, and otherwise well calculated to gladden the heart of its swarthy denizen. It has long since shaken off that lethargy which it enjoyed by right of birth, and, though many traces of its *Castilian* origin yet linger about its suburbs, has developed into the brisk, stirring, galloping life of an enterprising American city.

The old San Buenaventura Mission Church is still standing, although ninety years have elapsed since its foundation. Rows of adobe buildings still exist in its immediate vicinity.

A Court House and Public School building have recently been erected, at a cost of $12,000 each.

The wharf has an extreme length of 1,400 feet, with warehouse capacity of 150,000 sacks of grain. The shipment of wool from this port is very large. The shipment of grain for last year amounted to 200,000 sacks. Two large lumber yards are established at this point, doing a good business. There are also three carriage manufactories. Bricks of a very good quality are manufactured here. The town contains four hotels, ten mercantile houses, four livery stables, two drug stores, two restaurants, and four blacksmith shops.

The Bank of Ventura is doing a general banking business, and is in a very flourishing condition. It was organized in December, 1874, and represents a capital of $250,000. The management is very efficient. A graded public school has been established, and is progressing very satisfactorily, under the supervision of Mr. F. S. S. Buckman.

The Congregational, Methodist and Presbyterian religious denominations are represented here, as well as an infinite variety of organizations of a secret and social type. The Ventura River flanks the town upon the west, the lower valley of which is called Ventura Canyon. This canyon forms the main street, Ventura Avenue, which from the ocean, for three miles inland, presents a carriage way, which is unexcelled. The town is supplied by water from the Ventura River, conducted by ditches to a reservoir, two hundred feet square, occupying an elevation one hundred and sixty feet above the town. It is expected that a change will soon be made in the mode of conducting the water to the reservoir, pipes being substituted for the ditches now in use.

HUENEME

Is the town next in size to the county seat, and bids fair some day to strip the honors from her more advanced rival, through the fact of her holding as tributary a much larger amount of farming land, and from the possession of other advantages. Hueneme is located on the coast, in Ventura County, about fifteen miles south of San Buenaventura. It is the shipping point of a vast fertile valley, and sends more barley to the San Francisco market than any other port on the coast. Its shipping facilities consist of a fine wharf and two extensive warehouses, having a capacity of 100,000 centals, possessing all possible conveniences for receiving grain from teamsters and delivering it on board of vessels. Goodall, Nelson & Perkins run regular steamers to this port, and during the harvest months, three boats per week are insufficient to place the grain of this section in market.

Hueneme consists of about fifty houses at present, and is rapidly growing, there being splendid opportunities for all tradesmen and mechanics. A good school, hotels, several stores, postoffice, telegraph office, and the usual number of other country places of business, make up the town. For business advantages it has no equal, as there is no town in Southern California having a finer area of back country, or better communication with the San Francisco market. For mechanics and laborers, there is an unlimited field, as new wants are continually developing from the actual productiveness of the surrounding country.

The artesian well located here is a marvel to all strangers, being situated on the beach, and furnishing sufficient water for the entire town, besides having a large surplus.

SATICOY

Has a central situation in the Santa Clara Valley, North of the Santa Clara River, about eight miles from San Buenaventura, and about the same distance from the ocean.

It was founded but a few years since by Mr. E. B. Higgins, and has a store, blacksmith and wagon shop, school-house and post office.

It is situated upon the famous Briggs Rancho, and near it is the renowned Saticoy Spring, famed for its abundant flow, and the purity of its waters. It is in the centre of a magnificent fruit and grain-growing section.

The only drawback upon Saticoy is the fact that it offers no accomodations to travelers. While passing through there recently, we were obliged to select a "soft spot," while heaven furnished the only canopy which covered us. People would do well to avoid towns where so little enterprise is displayed in a proper direction, and strangers are left totally unprovided for. Good quarters can be found upon either side, at Hueneme, or Santa Paula, and this town should be passed through as one crosses the desert—as speedily as possible.

SANTA PAULA

Is a small village, eight miles up the valley from Saticoy. It contains a school, two hotels, two stores, two flouring mills, and two blacksmith and wagon shops. Santa Paula Creek passes through the town.

Everything thrives well upon the soil of this locality.

A ditch from the Santa Clara River, twenty miles in length, passes through the valley near Saticoy, to be devoted to any use which may be thought proper.

All along the borders of the valley wood is abundant. Messrs. Blanchard & Bradley have a large flouring interest at this point, and are also holding lots and "tracts" for sale at very reasonable prices, and on very generous terms.

NORDHOFF

Is the settlement in the famous wheat-growing valley of Ojai. It is sixteen miles north from the county seat, near the head of the Ventura River.

It has an extreme elevation of one thousand feet above the sea level; is one of the most beautiful and picturesque valleys in the State, and is one of the best resorts in the country for those afflicted with pulmonary complaints.

Here is one of nature's grandest solitudes, encompassed by scenery in keeping with the majesty of a position high niched among the fastnesses of her awe-inspiring hills. They tower above us upon all hands, no outlet is perceptible, and we feel as though immured from the entire world. Here no busy hum from the haunts of trade disturbs us, no wranglings from the world, no cry for help, no wail of agony. All is peace; unbroken quiet pervades this mountain dell. Were the mind of man so constituted as to admit of unalloyed contentment, and the happiness arising from it, here might he rest forever, nor wish to conquer the summits of these surrounding hills.

A brick hotel, with all modern conveniences, is to be erected here during the present year, for the accommodation of tourists and invalids. It will cost in the neighborhood of $10,000, and is to be a roomy, fine structure. To the tourist we would say, by all means visit Ventura County; to the immigrant, locate there.

SAN BERNARDINO, - CAL.

A GENERAL DESCRIPTION

OF

KERN COUNTY

KERN COUNTY is bounded on the North by Tulare; on the East by San Bernardino; on the South by Los Angeles; and on the Southwest by San Luis Obispo. It is of

AN AREA

Of about eight thousand square miles, and contains about one million nine hundred and twenty thousand acres. Of this about seven hundred and fifty thousand acres are well adapted for agricultural and grazing purposes, though, comparatively speaking, but a small portion is under cultivation. Want of transportation facilities, distance from the markets of the State, and the scanty population of the County, are causes which tend to give sheep-raising and mining a predominence over the farming interest.

THE COUNTY

Was organized in 1866, and contains nearly two-thirds of the territory formerly included in Tulare County. It comprises portions of the Sierra Nevada, the Coast Range, and the valley lying between them, as well as a portion of the desert valley lying to the eastward of the Sierras.

THE ASSESSED VALUATION

Of its property, in 1874, was $3,603,316.

ITS PRINCIPAL TOWNS

Are Bakersfield—the County seat, Havilah, Kernville, and Glenville. The other towns, of which there are many, are small and unimportant.

IN POSITION

Kern County is almost inaccessible, the lofty mountain wall being without a break, except at the north. Were it not for its inaccessibility, it would probably ere this have become one of the most important, in population and developed resources, of the interior counties.

Its mineral deposits are rich and varied. It has gold mines, both quartz and placer, large salt deposits, sulphur, and other minerals. Petroleum is also one of its products, though here, as elsewhere in California, its production has not been attended with very profitable results.

Along the western border of the County, from its southern extremity to the Kern River, are salt marshes, brine and petroleum springs, covering an area of about four hundred square miles. These really vast resources are, as it were, locked up, from the fact of their interior position and a scarcity of roads, which sadly interfere with the process by which the producer exchanges his product for value received.

THE PETROLEUM

And asphaltum deposits occupy an extent of country nearly forty miles in length, extending from the eastern corner of Santa Barbara County to Buena Vista Lake on the north. Buena Vista Lake is a sheet of alkaline water, about seven miles in length by two in width.

The most extensive of the petroleum deposits lies to the southeast of this lake, a distance of about eighteen miles. Here is a spring, covering nearly an acre, of thick, heavy oil, termed maltha. The surface is constantly agitated by the escape of gas. Works were erected here in 1864, for the purpose of refining oil for the San Francisco market. After manufacturing some thousands gallons of oil of good quality, the work was abandoned, as the cost of sending it to market enhanced its value to such a degree as to render successful competition with the article shipped from the Eastern States impossible. This belt of oil springs lies parallel to that extending along the coast in Santa Barbara County, the coast ranges alone intervening.

THE MOUNTAIN RANGES,

Which almost enclose the great plain forming the centre of this County, tower to a height of from eight to ten thousand feet. The buttresses of the Sierra Nevada and the spurs of the coast range project in some places nearly across the plain. There is only one pass to the West, the Paso Robles, which reaches an extreme elevation of four thousand eight hundred feet. On the South is the Tejon Pass, which achieves an elevation of five thousand two hundred and eighty-five feet above the sea. During the Winter and Spring the higher peaks are covered with snow. The lower elevations are well timbered with oak, pine and fir.

Mount Pinos and Mount El Dorado, two of the highest peaks in the Southern division of the Coast Range, have an altitude of nearly eight thousand feet. The San Emidio Canyon heads between these two mountains.

Nearly the entire Western portion of the County is valueless for purposes of agriculture. On the South and East many of the mountains and the low hills are covered with a luxuriant growth of grasses and shrubbery.

On the East, spurs of the Sierra Nevada, called the Tehichipa Mountains, rise to the height of nearly eight thousand feet.

Over these mountains the pass is four thousand feet above the sea level.

To the Eastward of these mountains is the fertile, well-timbered valley of Tehichipa. It covers an area of about twenty-four square miles, and contains fifteen thousand three hundred and sixty acres. It is completely shut in by mountains averaging from seven to eight thousand feet in height. It contains a small salt water lake, from which, by the process of solar evaporation, a large quantity of unusually fine salt is manufactured. Although this manufacture could be increased to almost any extent, still the causes which paralyze the production of petroleum, and the cultivation of cereals to any extent, operate equally against this, and the largest amount obtained in any year was that of one hundred tons, aggregated in 1867. Through this valley lies the stage road leading from Los Angeles into Inyo County.

JOE WALKER'S VALLEY,

So named in honor of the first settler in the County, who arrived in 1835, lies to the Northward of the Tehichipa Range. This valley, like the other, is completely surrounded by lofty mountains. It contains two thousand four hundred acres of very fertile land, yielding from forty to sixty bushels of wheat, from fifty to sixty bushels of corn, or sixty bushels of barley, to the acre. All kinds of vegetables and hardy fruits grow here luxuriantly. The hills are well timbered, and the supply of pure water is abundant. There are numbers of these mountain-locked valleys in various parts of the County. The valley of the

SOUTH FORK OF THE KERN RIVER

Is one of the finest in the County, containing about nine thousand six hundred acres of most arable land, well watered and timbered. This valley is about eight miles North of Havilah, the former County seat.

LINN'S VALLEY,

Lying a few miles to the Southward of that previously mentioned, offers climatic and agricultu-

ral inducements to those desiring a good farming locality. The fertility of the soil is such that the cultivator is richly repaid; the thermometer rarely runs above 90° in the Summer, or below 50° during the Winter months. The water is good, and the supply bountiful.

It is quite a thriving settlement, and boasts a grist and saw mill.

The hills and rivers along the entire Eastern and Northern portions of the County are rich in gold-bearing quartz and placer gold, the production of which forms the leading industry of the County, and gives employment to by far the largest portion of its inhabitants.

KERN RIVER,

From which the County derives its name, was formerly termed by the Mexicans Rio Bravo. It derived its present name from a Lieutenant Kern, formerly one of Fremont's exploring party. It is one of the largest of the Sierra rivers, and gives to this region, in a system of interior lakes, a notoriety arising from so peculiar a characteristic. It traverses nearly the entire County, passing from East to West, entering it near Walker's Pass on the East, and emptying into Goose Lake at the base of the Coast Range on the West. It receives numerous tributaries, and waters a large agricultural district. By numerous and repeated experiments it has been ascertained that this portion of the County is well adapted to cotton cultivation. Several good crops were produced as early as ten years since, being disposed of at good figures. The cost of labor and transportation rendered its cultivation still less profitable than other crops, which was reason sufficient for its abandonment.

There are numerous mining districts among the mountains and along the creeks, near which to meet the demand, villages have sprung up. They have that straggling appearance of hasty and imperfect growth which fixes its unmistakeable stamp upon all such communities. Society is simply conglomerated for the time being. Everything is temporary and subject to rapid and repeated change; no thought is ever taken about harmonizing the surroundings either of place or society; all is rank, absolute conservatvism, in the worst phase of its slip-shod, down-at-the-heel existence. No law, save that of the heaviest hand; no order, save the dis-order of the barroom brawler; no church, not even the unseasoned pine structure which enjoys the honor of the first cleared place in the wilderness, which by its meek teachings would at least serve to exercise a slight restraining influence; no school system, and few if any schools. How many such can one call to mind, peopled with the "Colonel Starbottles" and "Jedge Phinns," the omnipresent and exultant heroes of the bowie knife and gin flask, whose knowledge reaches its climax in that they are able to distinguish "their own whiskey skins," and whose high-toned qualities impel them towards the most extreme measures with those rash enough to dispute with them the question of ownership. Yes, we can see it now, the rough board shanties, marching at will down the uneven street, paved with red flannel shirts, old socks and tin cans. Occasionally a squalid, wretched looking woman shows her disheveled head at door or window. Now and then a human form, bearing a pick or shovel, swaggers his superabundance of beard and his scantiness of attire towards the Magnolia Saloon, where, before his array of cut glass, stands the only man in the town whose appearance augurs prosperity.

The Colonel stands upon the porch, that effulgent and proudly swelling feature, which was presumably once a nose, shedding rays not so benignant nor so odorless as those from that rival luminary, which in his presence seems to undergo a partial eclipse. This is the seventy-fifth time since sunrise that providence has sent a messenger to minister to his liquid wants. Number seventy-five does not shatter the Colonel's confidence in human nature, by drinking alone, but suavely asks him to "jine." Mr. Bland serves out the compound, twirling the spoon gracefully and deftly in his be-diamonded fingers, while his richly caparisoned shirt-frill dances approvingly to the effort. The Colonel talks for a moment pensively regarding the nobililty of his early-day associates. What men they were, and what "carving" they did upon the slightest opportunity. He drops in his glass a tear or two, to their memory, glides upon the porch to wait for number seventy-six, and life at Squalor Hollow moves on in its even tenor, each day repeating itself.

Such was the mining town of a few years since. Let us hope that time has worked a desirable change, straightened the street, evened-up the houses, removed the fragments of cast-off garments, taken a spoke from the wheel of friend Bland's prosperity, added a neat little house of worship to the structures of the town, where the man of God presides on Sunday, and the "schoolmarm" during the week; and let us hope that the Colonel's ruby beak may have bleached to its pristine whiteness, that his self respect, which fled long ago before the stress of evil associations and strong temptation, may have returned, taken him by the hand and led him back through the forgotten paths; past the fragments of his early resolves; over the abandoned hopes and unfulfilled aspirations of his early manhood; to a life more in consonance with whitened hair and ripened years.

The production of

QUARTZ AND PLACER GOLD

In Kern County is very large, the County honestly earning its reputation as one of the most important mining section in the southern portion of the State.

The causes which have long militated against the prosperity of this County are rapidly being removed.

THE RAILROAD,

Which has its temporary terminus at Caliente has already given an impetus to all established industries, has suggested the introduction of new interests, and by the time the road is completed, which is being rapidly built, having the southern sea coast at one extremity, and San Francisco at the other, all the benefits which result from rapid land and cheap water communication, will be at the service of this community, and will give an impulse to endeavor which will ultimately enrich the individual, and add materially to the productive wealth of the State.

BAKERSFIELD,

The principal town and County seat of Kern County, is located one mile from the San Joaquin branch of the Southern Pacific Railroad. It is one hundred and forty miles north of Los Angeles, and two hundred and ninety-eight miles southeast of San Francisco. The town has an eligible and pleasant situation upon the banks of the Kern River. The surrounding country is exceedingly rich in soil resources. The railroad has given large accessions to its population, and to that of the neighboring valleys. Gold mining in the adjacent mountains, together with the silver mining interest of Inyo County, adds largely to the importance of its trade. The Kern furnishes a sufficient water-power to induce the establishment of large manufacturing interests, and will, no doubt, at no distant day, be fully utilized.

A NARROW-GAUGE

Railroad to Santa Barbara, has been projected, and a company already formed in that city for its construction. Santa Barbara is ninety miles distant.

HAVILAH

Is situated forty-five miles Northeast of Bakersfield, was once the most important town in the County and the County seat. It is situated on Clear Creek, a small stream tributary to Kern River, which it enters from the south. Its position is inaccessible, it lying in a cleft or defile of the mountains. Its resources are entirely of a mineral character, and it is the center of a large and richly paying mining region. Since a branch of the Southern Pacific Railroad was extended to Bakersfield, the mines in this vicinity are attracting much notice.

Havilah is named from a place mentioned in Genesis, where a land of gold is for the first time alluded to. It has communication with the railroad points of Tipton, Tulare City, and Bakersfield, by daily stage.

GLENVILLE

Is a small town situated in Linn's Valley. It is altogether unimportant in every respect, except that it is a postoffice.

CANFIELD

Is twelve miles southwest of Bakersfield, which latter place is its postoffice.

KERNVILLE

Lies sixty miles Northeast of Bakersfield. It is quite a thriving place. Near it are a dozen or more important quartz ledges, on many of which extensive mills have been in operation for several years, the yield being handsome.

KERN ISLAND,

Situated in a delta of the Kern River, is a large tract of fertile country, offering decided advantages to those desiring to settle. The Kern Island Irrigating Canal is a work which is now attracting considerable attention. It has for its object the rendering productive, lands which are now in a condition of almost absolute sterility, from the fact of their possessing no natural irrigating facilities. Another work of this nature was some time since commenced by a company calling themselves the San Francisco Canal Company. Their ditch begins upon the North side of the river, moving along the plains on the highest lands practicable. It is stated that it will be thirty miles in length, having a width of one hundred feet. If this work be successfully terminated it will redeem from perfect waste many thousands of acres, which but need this advantage to render them of almost incalculable value.

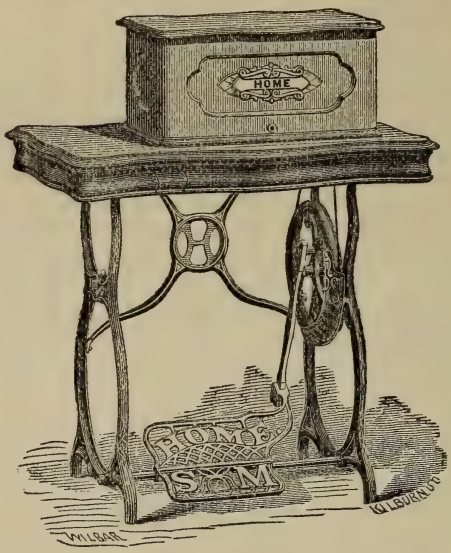

PRICES REDUCED !

SAVE $50. WHY PAY $80.

THE NEW IMPROVED

Home Shuttle Sewing Machine,

PRICE $30.00

This Machine, being much Improved, is as good as any in the Market. We also sell the

Home Sewing Machine.

This Machine is entirely New, and is very Superior, combining ALL the points of excellence of the Older Machines. The above are the

LIGHTEST RUNNING

and by far the most easily operated Machines in the Market, and so simple that a child readily comprehends them and can operate them.

DOWN WITH MONOPOLY.

The Grangers' Favorite

AND CHAMPION OF THE WORLD.

IS NOISELESS, SEWS FASTER, RUNS LIGHTER,
AND HAS GREATER MECHANICAL SIMPLICITY
THAN ANY OTHER MACHINE IN THE WORLD.

THE WINNER AT LONDON, 1862; PARIS, 1867; VIENNA, 1873.

WHEELER & WILSON,

Improved Draw-Feed Sewing Machine!

IS THE ONLY LOCK-STITCH WITHOUT A SHUTTLE.

DISTINGUISHED HONORS.

WORLD'S EXPOSITION, VIENNA, Nov. 1, 1873.—"The Emperor of Austria has conferred the Imperial Order of Francis Joseph on the Hon. Nathaniel Weeeler, President of the celebrated Wheeler & Wilson Sewing Machine Company of New York.

The Best is the Cheapest. Buy no machine until you have seen the New "Draw-Feed Wheeler & Wilson." It will last a lifetime. Every Purchaser made a perfect operator. ALL MACHINES GUARANTEED.

Sold on Easy Terms.

SPECIAL ATTENTION GIVEN TO ORDERS SENT TO

E. W. HARRAL, No. 20 Geary Street, San Francisco.

BAKER & HAMILTON,

13 to 19 Front St. | **9 to 15 J St.**

SAN FRANCISCO. | SACRAMENTO.

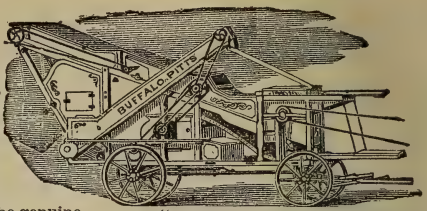

Ames Threshing Engine.

MANUFACTORY

Sweepstake Plow Co.

San Leandro.

CAUTION.—We are the only importers of the genuine Buffalo Pitts Threshers. There are numerous imitations, and purchasers should be certain to see that all have our name on them if they desire the genuine.

PITTS "GENUINE" BUFFALO THRESHER.

The Ames Portable and Threshing Engines are made with special reference to the requirements of this Coast.

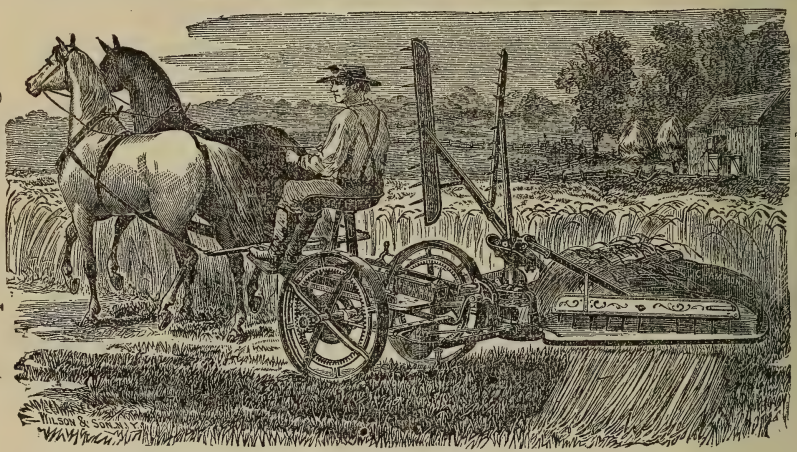

Our terms are liberal, and we are determined not to be undersold.

WE HAVE THE

BEST STOCK OF HARDWARE ON THE COAST.

SOLE AGENTS FOR

Gem Sowers, Cahorn Sowers, Bain Wagons, Sweepstake Spring Wagons.

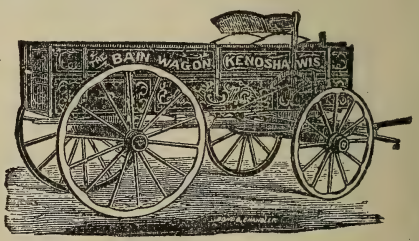

Pitts Buffalo Powers, Baxter Engines, Burr-Stone Grist Mills, Nonpareil Grist Mills.

THE CELEBRATED CHAMPION SELF-RAKE REAPER AND MOWER.

Sweepstake and Eureka Gang Plows.

The Sweepstake Plow Co. make the best Gangs in the world. Universally esteemed superior to all others. Send for list.

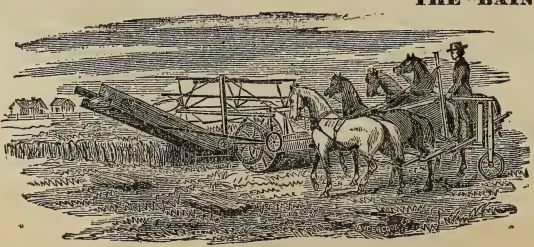

THE "BAIN" WAGON.

The Sweepstake Single-Gear Headers as sold by us are the best in the State. The improvements are adapted to this Coast, and the Header is complete in every respect. Made to cut from 10 to 24 feet.

We are sole agents for

THE GENUINE

Haines Headers.

SWEEPSTAKE SINGLE-GEAR HEADERS.

The "Bain" is the only wagon which will stand the dry climate of California. Every wagon sold gives perfect satisfaction, and is a model of neatness and beauty, combined with strength.

A GENERAL DESCRIPTION

OF

SAN BERNARDINO COUNTY.

San Bernardino County is bounded upon the North by Inyo County and the State of Nevada; on the East by the Colorado River; on the South by San Diego County; and on the West by the Counties of Kern and Los Angeles. It was

ORGANIZED

In 1853, previous to which year it formed a portion of Los Angeles County. It derives its name from the old mission of San Bernardino, founded by a Mexican named Lugos, who once held by grant the entire magnificent valley of San Bernardino, cultivating it almost altogether by means of Indian labor.

This immense tract was purchased from the original grantee by Messrs. Rich and Hanks, in the year 1851. San Bernardino is the largest County in the State, covering an

AREA,

According to Mr. Arthur Kearney, one of the County's most able chroniclers, of twenty-two thousand, four hundred and seventy-two square miles; an area embracing only two hundred and fourteen square miles less than the aggregated areas of Massachusetts, Connecticut and Vermont.

ITS POPULATION

We are warranted in stating, by the authority before quoted, at about nine thousand, in the year 1874. The total value of

REAL AND PERSONAL PROPERTY

represented in the County for the present year is about $2,000,000, or an excess of about $500,000 over the assessed valuation of last year. In this County, too, real estate is not assessed above one-fourth of its real value. The County is separated into

TWO GREAT DIVISIONS,

By the San Bernardino range of mountains. The division to the Eastward lies within the valley of the Colorado River; is an arid waste, totally worthless for agricultural purposes, and almost, if not quite, uninhabitable. The other division occupies the space intermediate between the Western slope of the San Bernardino Range and the boundary line of Los Angeles County. This portion of the County has an area of two thousand square miles, nearly all of which is extremely fertile. These divisions present a wonderful contrast, one being the exact antithesis of the other in point of climate, topographical formation, adaptability of soil, and general resources.

The Southwestern slope is an elevated plain, well watered and fertile.

The Temescal Mountains, in which are the celebrated Tin Mines, are in this portion of the County. There is said to be an area here of one hundred square miles, permeated by veins of this ore. It is only partially developed, and not even fully explored.

Vineyards, orchards and well-tilled fields give abundant evidence of the richness of the soil in this portion of the County. It is especially noted for the excellence of some of the varieties of grapes produced, chief among which is the Cucamonga.

In all directions throughout the San Bernardino Range, agricultural settlements occupy the valleys. They are exceedingly prosperous; the soil yielding abundant crops.

THE COAST RANGE

Covers about three millions of acres, large portions of which are valuable for grazing and mining purposes. The mountains and hills being heavily timbered, offer large lumbering advantages. Much of the finest land in the County has been owned in large tracts, old grants of the Spanish Government, some of them covering eleven square leagues. This, in time past, operated seriously against the advancement of the County, as the means of the ordinary settler were inadequate to the purchase of such enormous tracts. He was, therefore, obliged to take his modest means to other localities. This difficulty has long since been obviated, as the grants have, from time to time, been purchased and subdivided into farms of more reasonable dimensions.

Among the volcanic ranges in the Northern and Eastern portions of the County, the precious metals, both gold and silver, have been found in abundance; mining districts have been established, but so unfitted for habitation is that sterile locality, so impossible of obtainance are those primal necessaries of life, wood and water, that one after another have been abandoned, even the promise of untold riches, of known existence, being insufficient to induce the sturdy miner to undergo the hardships and privations of a region of such utter desolation.

This portion of the County presents undeniable evidence of its volcanic origin. It has been torn, wrenched, melted and fused by the gases generated and the fires which raged beneath. That it was afterwards subjected to the action of water, being, probably, submitted to the tide processes of the vast ocean for ages, there can be no doubt; at least that time was required to soften its rugged outline and remove its jagged excrescencies. Everywhere can be seen the dry beds of former water bodies, borne from the ocean at its final emersion. Upon all sides, one can mark extinct volcanoes, beds of pumice, fragments of lava; can find hot springs, sulphur deposits, and a thousand and one evidences of what existed in the past, as well as assure himself that the processes which occasioned the depression and uprisal of this vast section of country are simply smouldering—by no means extinct.

Vegetation here is very scanty, and differs radically from that of the other division of the County. A plant of the palm variety, termed the Yucca, is its most abundant growth. It attains a height ranging from five to fifteen feet. The extreme diameter of its stem, for the largest growth, is about one foot, having from two to five branches. Its leaves are similar in shape to a bayonet blade, and it has an exceedingly rough, rugged appearance, caused by the leaves, which depend close to its stem. It is almost the sole growth which could serve as fuel in this entire waste. The

SODA LAKE

Lies in this section of the County. It is a glaring misnomer, which presents the wondrous anomaly of a lake without water. It receives the discharge of the Mojave, but retains none of its large supply, the water sinking through the alkaline soil with a rapidity equal to that of its influx.

San Bernardino County possesses an area of

TIMBER LANDS

Measuring, approximately, seven hundred and twenty square miles. The growth consists of sugar, pitch and yellow pine; balsam, fir, cedar and spruce; together with some oak, alder and maple. When the railroad shall have carried into this region a representation of all the manufacturing industries, these vast timber reserves will prove a source of inexhaustible wealth. The

RESOURCES

Of this County are agricultural, pastoral and mineral. We place its mineral resource last in the schedule, not that it is in reality most unimportant, for, indeed, it is almost boundless; but it seems to us that a country truly prosperous, in the full sense of the term, must base its prosperity upon its agricultural interest, especially when it is favored in climate and soil, and has such facilities for irrigation as would tend to render a development of that interest a matter of ease, and crown all efforts in that direction with unqualified success.

THE PRINCIPAL VALLEYS

Of this County are the San Bernardino, Rincon, Juapa, Chino, Las Ceirros, Jurupa, San Gorgonia and Uciapa.

San Bernardino, the principal valley, occupies the Southwestern portion of the County. It is about fifty miles in length, having a width of about twenty miles. On the East, North and South, it is skirted with lofty, timber-clad mountains. From these mountains descend into the valley innumerable streams, whose devious courses can be traced by the growths of willow, sycamore and other trees which fringe their banks, and cause the great plain to resemble the carefullly laid out pleasure domain of some railroad or stock-jobbing "Crœsus." The Santa Ana River, quite a large stream, traverses the entire length of the valley, which, thus sheltered and watered, could not be otherwise than the favored locality it is, both in the attractions presented by its unparalleled climate and the rich resources of its soil. Its products are widely diversified; nearly all known fruits, grain and vegetables are successfully and profitably cultivated, those indigenous to the tropics side by side with those transplanted from Northern climes. In this valley there are one hundred artesian wells; water being obtained at depths varying from seventy to two hundred feet. The County possesses good

EDUCATIONAL ADVANTAGES.

It has twenty-one school districts, nearly all lying within the San Bernardino Valley.

The range of the thermometer is from 40° to 100°, the mean temperature, however, being from 60° to 65°.

In the County are three flouring mills, five steam saw mills and two planing mills.

At Holcombe and Bear Valleys, on the Northern side of the great peak of San Bernardino, are valuable placer and quartz mines, which have been worked with marked success for about fifteen years. Placer gold is also found in large quantities along Lytle Creek, a tributary of the Santa Ana.

THE PRINCIPAL TOWNS

Of the County are San Bernardino, the County seat, Holcombe, Old San Bernardino, Rincon, Riverside, San Timoteo, Valverde and Ukipah.

The County seat is the only large town in the County; the others being mere agricultural or mining settlements, with the exception of Riverside, which is an enterprising, thriving little town.

SAN BERNARDINO,

The County seat, is situated in the San Bernardino Valley. Its site is upon the level plain about five miles distant from the foot-hills. It is literally embowered, the pepper trees, willows and cottonwoods almost concealing it from the careless glance.

Its streets are spacious, its buildings substantial, and possessing an air of comfort rather than elegance. Everything attests to the thrift and general well-being of the community.

The town site was chosen and settled by the Mormons in 1847. The town was laid out after the usual plan of Mormon towns, in large blocks, sufficient to form a homestead for a family.

It lies across the route to the Southeast and into the great desert. It is also the central point where meet the various roads leading to the mining districts of Panamint, Hualapai, Death Valley, the Upper Colorado, Holcombe Valley, La Paz, Prescott and Yuma.

Thus, to add to the wealth and importance of the little city, both trade and travel are concentrated. The route of the Southern Pacific Railroad is surveyed through the town, leading, by way of the San Gorgonio Pass, to the Colorado at Fort Yuma. Much doubt is expressed regarding the immediate building of this road. The cars are running from Los Angeles beyond Spadra, leaving a distance of only twenty-four miles between this town and railroad connection. San Bernardino has a population numbering between thirty-five hundred and four thousand. Its population is rapidly increasing, as are also its business interests. The town was organized in 1869. There are six

CHURCHES,

The Presbyterian, Methodist, Congregationalist, Mormon, Spiritualist and Catholic denominations being represented. The church structures are, some of them, costly buildings, but erected with greater regard to comfort and convenience than any elegance in architectural display. The

NEWSPAPER INTEREST

Is represented by three sheets, the *Guardian*, *Argus* and *Advertiser*. The two former issue daily and weekly sheets. The latter has only a weekly issue. All the prominent

SECRET SOCIETIES.

Have lodges here, and seem to be as prosperous as elsewhere throughout the State.

San Bernardino will, in the future, be one of the most prosperous of the inland cities of the State. Everything seems to indicate it. It is the point where converge all the interests of the County, all the industries of which pay her tribute. When the railroad is finally completed into Arizona, a new field will be open to her. The travel passing through to this new territory, as well as that flowing back, will add to her prosperity; while the producer in that new country, whatever be his product, will find his nearest market at her door.

RIVERSIDE,

A post office town, and the seat of one of those thriving colonies, through the establishment of which, Southern California has attained, in a great part, its population, lies twelve miles Southwest from San Bernardino, twenty-eight miles from Spadra, the recent terminus of the Southern Pacific Railroad, and about fifty-eight miles from Los Angeles. It has an area of one square mile, and a population numbering between six and seven hundred.

The town lots contain, each, two and one-half acres; shade trees abound; the structures are neat and taseful, and, judging from appearances, it is one of the most delightful little spots in the County.

The great natural adaptivenes of both soil and climate gave the cue for the establishment of the colony, capital having thus been induced to invest largely for the introduction of the only element needed to fully develop it.

The colony and town date only from 1871. In that year was built the work above referred to, the Riverside Irrigating Canal. Its construction was effected at the cost of $60,000, one year being required for its completion. It was finished in 1871.

The water is taken from the Santa Ana River. It has an extreme width at the top of twenty feet, narrowing to eight feet at the bottom. It flows four feet of water; is above fifteen miles in length, and we are informed is being extended still further; our informant fixing its begining at Agua Mansa, its termination at the Hartshorn tract, some eight miles beyond Riverside.

There is searcely any fruit, cereal or vegetable, the growth of which is ~~which is~~ not favored by the soil and climate of this "garden spot." With a growth proportional to its merits, it will some day be one of the leading colonies of the State.

HOLCOMBE AND BEAR VALLEYS

Lie upon the North side of the San Bernardino mountains, in a wide plateau or broad valley, about thirty-five miles from the town of San Bernardino. The mines here, both quartz and

placer, have periodically, since 1860, attracted considerable notice. The yield has been considerable, although they have, at times, been abandoned. They are now being vigorously worked, with flattering results.

RINCON

Is a post office; the settlement a small one.

VALVERDE COLONY

Is as yet somewhat prospective, although the advantages offered cannot but lead to an early and full development. It is situated upon the Mojave River, about forty miles North from the valley of San Bernardino. It has secured the entire water privilege of the Mojave, and needs but this adjunct to its fertile soil and favorable climate to render it a formidable rival, in the diversity of its products and its wondrous growths, to the most favored portions of the State.

OLD SAN BERNARDINO

Is an agricultural settlement.

Thrifty settlements are also springing up in the valleys of Yucipa, San Timoteo and San Gorgonio.

THE SLOVER MOUNTAIN COLONY

Possesses two thousand acres of excellent fruit and grain land, some three miles from the town of San Bernardino, being upon the proposed, and, in fact, surveyed line of the Southern Pacific Railroad. It is under the management of gentlemen well known in the County, whose connection with an enterprise is alone a sufficient guarantee of its legitimacy.

It is the intention to divide this tract into ten-acre lots, to be sold at low rates and on reasonable terms to actual settlers.

An irrigating canal is now in process of construction, which will convey water from the Santa Ana River in sufficient quantities to answer all the needs of the agriculturist. In addition to this, it is stated that an artesian well will be sunk upon every forty acres, by the projectors of this enterprise.

The colonies of this County offer advantages to the industrious cultivator of sufficient importance to prevent their being overlooked. With the possession of but small means, in these communities, one may, in a comparatively short time, rise to a condition of ease and independence, if not affluence. A small tract of twenty or thirty acres, planted with oranges, almonds, walnuts or figs, will, in the course of a few years, yield a fine revenue, requiring scarcely any investment beyond that of the necessary labor. Few such desirable ends are to be achieved, so safely and certainly, the investor incurring so little risk. We trust they may have a full share of that prosperity which they certainly seem to merit.

A GENERAL DESCRIPTION

OF

LOS ANGELES CO.

Los Angeles County is by far the most desirable in point of climate and soil, the most advantageous in position, and the most prosperous in its relation with commerce and all the industries, of the Southern counties.

It is bounded upon the North by Kern County; South and Southwest by the Pacific ocean; on the Southeast by San Diego County; East by San Bernardino County, and West by the county of Ventura.

In outline it is very irregular, and contains about five thousand six hundred square miles, or three million five hundred and eighty-four thousand acres.

The county was organized in 1850.

The assessed valuation of property for 1874 was $12,080,366.

The Sierra Madre Mountains traverse the county through nearly its centre, forming slopes, valleys, and foot-hills, well adapted to stock-grazing. This mountain range forms a barrier between the fertile portion of the county, stretching towards the ocean, and the sandy waste, reaching on the North to the Colorado River.

For bee-culture, both slopes of this mountain range offer advantages such as are to be met with nowhere else in the United States.

The mountains are heavily timbered. The small valleys yield abundantly all kinds of vegetables and temperate climate fruits. The apples and plums, especially, are said to be excellent in quality, and much superior to those raised upon the foot-hills sloping towards the ocean.

For purposes of irrigation, Los Angeles County is amply provided with many and never failing streams. The principal streams are the Santa Ana, San Gabriel, Los Angeles, and Santa Clara Rivers. There are also quite a number of smaller streams, having their rise in the numerous canyons of the Sierra Madre, which furnish a very considerable supply of water. These flow into the valleys during the wet season, but do not reach the ocean, and in summer are generally dry.

The Santa Ana River has its rise in San Bernardino County, among mountains bearing the same name; flows southwesterly, irrigating the famed valley of San Bernardino, and cuts through the foot-hills near the county line, at a distance of about thirty-five miles from the ocean. Thence it continues, in the same direction, through the lower extremity of Los Angeles Valley, passing between the towns of Richland and Anaheim, emptying into the ocean between Anaheim Landing and Newport.

The San Gabriel has its source in the Sierra Madre Mountains. Its course is southerly into the El Monte Valley. This river loses its waters in the summer, but, as if to compensate, in rising again, forms two branches just where it is precipitated through the foot-hills on its way to the ocean. These two branches are designated as the old and new San Gabriel, and after fairly entering the valley, lie apart a distance of about three miles.

The Los Angeles River rises in the San Fernando Valley, and, trending toward the southeast, furnishes water for irrigating and domestic purposes to the city of Los Angeles and its vicinity. Generally during the wet season it extends some four or five miles south of the city. In unusually

wet seasons, however, it forms a coalition with the old San Gabriel, at a distance of about fifteen miles from Los Angeles.

The Santa Clara River rises in the canyons of the mountains between the Sierra Madre on south and the Sierra Nevada on the north. Its course is southwesterly through Santa Clara Valley, only the northeast portion of which is in Los Angeles County, the remainder lying in Ventura.

That portion of the county lying southwest of the Coast Range, forms a series of plains nearly fifty miles in length by about twenty in width. The lower plain contains the valleys of Los Angeles, San Pedro, and Anaheim. It skirts the ocean, lying from five to forty feet above the tide level. From the ocean, away to the distance of from twenty-five to forty miles, the ascent is gradual to the base of the foot-hills. These plateaus contain the finest agricultural lands of the county, and comprise the most beautiful portions of the southern coast.

The soil and climate of the lower plains are very uniform. The soil is a brown, sandy loam, exceedingly rich in vegetable matter, a trifle harder and more mixed with clay in the bottoms and hollows, a trifle more gravelly on the dividing ridges. Higher up in the foot-hills it becomes much harder, yet is not at all difficult to work when brought in contact with water. In some localities is quite an amount of alkali. The judicious cultivator will soon eradicate this by systematic working, though an abundance of this substance in the soil will render his labor for a time much less productive.

The sea breeze, which springs up between eight and ten o'clock A. M., during the summer season, blows from the Northwest, and imparts sufficient moisture to the atmosphere to prevent any oppressiveness from heat.

This combination of an extremely fertile soil with a climate unexampled for equability, endows Los Angeles with attractions greater than those of any other county of Southern California.

Grapes of all varieties and from all countries, thrive here luxuriantly. The Orange, Lemon, and Fig, and all semi-tropical fruits, attain perfection in growth, while the feasibility of irrigation renders a return of heavy crops in cereals and vegetables, a matter of certainty.

The extreme range of the thermometer is less here than in any portion of the United States or Europe, being 23° from January to July.

In the season of 1872, the Southern counties produced 4,500,000 oranges and 1,500,000 lemons. Since that year more energy and capital has been directed towards this production than ever before, and the yield of the past season must have been very much in advance of those figures.

Mr. B. D. Wilson is devoting himself to fruit and grape culture. His orchard and vineyard are located in the San Gabriel Valley. The orchard contains in the vicinity of two thousand orange trees in full bearing. The vineyard is widely known. Its product for the past year amounted to 75,000 gallons wine, and about 4,000 gallons brandy.

Gen. George Stoneman is engaged in the same culture in the same locality. His ranch, the Los Robles, contains four hundred and fifty acres, two hundred of which are devoted to vineyards, grape culture being his specialty. Fifty acres are used exclusively for orcharding, in which all kinds of fruit find place. Of orange trees there are twelve hundred; also lemon, lime, citron, fig, olive, apple, pear, peach, plum, nectarine, cherry, pomegranate, (1000), mulberry, and walnut, each fruit in all its different varieties. There is a constant flow of about eight thousand gallons of water per diem, from two springs on this magnificent property.

We noticed here a rose, termed "Cloth of Gold," whose flower, in full bloom, measured fifteen inches in diameter. We also saw roses blooming upon stems thirty feet from the ground, of perfectly natural and healthy growth. The yield from the General's vineyard for the past year, produced about 20,000 gallons wine, and some 2,000 gallons brandy.

Mr. L. H. Titus owns the celebrated "Dew Drop" orchards, in this same vicinity. Of orange trees he has the enormous number of 2,850; lemon, 400; lime, 300; also a profusion of peach, pear, apricot, olive, nectarine, fig, pomegranate, apple and quince trees, besides ten acres of vineyard, with 10,000 vines. Surrounding the orchard is a live hedge of three quarters of a

mile in extent. There is probably but one orange orchard in the country which will compare with that of Mr. Titus: that owned by Mr. Rose. These surpass the most famed orange groves of Italy, and are the finest in the world.

The Marengo Ranch, owned by Mr. F. P. Bacon, is situated seven miles Northeast from Los Angeles. It is a magnificent piece of property of 8,000 acres. Mr. B. has a vineyard of 40 acres in full bearing, and 150 acres of orchards, containing 1,500 orange trees and 800 walnut, besides lemon, almond, peach, pear, apple, and fig trees in good growth and in full and best varieties. The water facilities are excellent, sufficing both for irrigating and domestic purposes. The springs from which the water supply is derived, are at a sufficient elevation to force the water to any portion of the property. The ranch also comprises extensive timber lands with timber of the best quality, there being 300 acres of white oak, live oak, red and black oak. The elevation above the sea level is one thousand feet. The soil varies from a sandy and gravelly loam to a black adobe. Frost never visits this locality.

COUNTY SCHOOLS.

The educational interests of Los Angeles County have not been allowed to suffer. The school fund for 1875 amounts to nearly $70,000. There are forty-four school districts in the county, independent of those in the city of Los Angeles. The course of instruction is as advanced as in schools of the same grade anywhere in the United States, the teachers being as carefully chosen with reference to their competency as moral and educational instructors. The school buildings are commodious, suitably located, well constructed, and substantial structures.

The well devised and effective school system of this county forms one of the chief attractions this locality offers to immigration, and has no doubt already made large additions to its population. The number of teachers employed is fifty-two, with a daily attendance of about 2,000 pupils.

GRAZING.

Formerly the large and principal resource of this county was cattle-grazing. The miles upon miles of verdant pasturage formed a natural advantage which the Spaniard was prone to appreciate, and the opportunity was by no means neglected. Agriculture and the kindred industries, implanted and fostered only by the hand of an energy to which that nation is a stranger, have placed it as a resource, far in the background. Still the large importation of cattle and hides from this county amply attest that it still lingers among the industries, and forms one of the resources, though one of the least, of the county.

LANDS.

Mr. Norman C. Jones has 5,000 acres in the most desirable portion of Los Angeles County, formerly known as the Rancho Azusita. It includes the old Mexican homestead; beginning where the San Gabriel River emerges, and extends westerly along the southern base of the San Gabriel Mountains to within four miles of the old Mission church and depot of the Southern Pacific Railroad. It is traversed for five miles by the Los Angeles and Independence Railroad. Mr. Jones is bringing water by a large canal from the San Gabriel River, to feed a reservoir of sixty acres, eighty feet in depth, sufficient, he states, to irrigate all the land to the Mission San Gabriel, seven miles distant. He this year plants 500 acres to corn. His land will be brought to market with a perfect water supply within a short time.

Mr. Geo. W. Freeman owns a very fine property near Tustin City, where there is some of the best land in the county.

Mr. B. D. Wilson has 400 acres of land in the immediate vicinity of Wilmington, which he is offering to sell in small lots of five, ten, and twenty acres, to actual settlers. The land is laid off in plots containing twenty acres, bounded by wide streets. The soil is a dark, sandy loam, exceedingly rich, and will produce all varieties of semi-tropical fruits, besides fruits and vegetables of temperate zones. Soft water can be obtained at a depth not exceeding twenty-four feet. These lots are to be sold at low rates, from one to five years time being granted, at legal interest. Mr. Wilson,

in offering these bargains, is influenced by a desire to build up the town and surrounding country. Good schools are within a few minutes walk of any portion of this land.

MINING.

Its mineral resources are, beyond question, very great and valuable. Some forty-two years since, in 1833, the first gold positively known to have been discovered in the State, was found in the valley of Santa Clara. But whether in that portion of the valley lying within the boundary of Los Angeles County, or in that belonging to the present county of Ventura, it is impossible for us to say. Both counties claim this honor, and it seems to be a question, the decision of which should be left to them.

Comparatively little attention has been given to developing the mineral wealth of this region, although expert miners have characterized it as comparable with the richest portions of the State. Mining organizations have been formed, with large amounts of paid-up capital, but for some reason the developments have not been commensurate. It is presumable, however, that no full developments have as yet been made. Many are looking anxiously to see what the next year or two will do for these mining interests. Certain it is, that in some localities, take the vicinity of San Fernando for instance, thousands of acres of as rich placer exist as ever were washed, from whence "pay dirt" has been carried four miles to water. This granted, what may not be effected with a profuse water supply, such as will be secured by the large ditches now being constructed?

At the head of the Santa Clara River, where is located the town of Soledad, veins of gold-bearing quartz are being worked at a large profit. Copper-bearing veins are also numerous in this locality. It is fair to presume, however, that, where base metal exists in juxtaposition with the precious metals, it will not be worked with profitable results.

On the Northeastern slope of the San Gabriel Range, bordering upon the Mojave Desert, large veins of copper as well as other minerals are found. Large beds of asphaltum are also here, and in the resources of the county the oil production forms a prominent feature. No excitement, but much strong feeling is evinced regarding the future oil developments of this region. The report of a body of United States engineers, some years since, which was adverse to the interests of this development, temporarily destroyed the confidence of those engaged in producing. This, together with the fact that the early experiments in refining did not terminate successfully, from the want of skilled labor, has occasioned the loss of some years and money to the pioneers in this enterprise. The value of it as a resource, however, if fully developed, with the positive assurance that nothing but persistent effort is necessary to effect the desired end, has been fully demonstrated. Operators think themselves warranted in proceeding, with the view of tapping some hidden vein or reservoir, and in engaging the services of a competent refiner. Some day, without doubt, they will triumph, and a new resource, fully developed and richly worthy of being thus characterized, will add to the already great wealth of this favored community. A large amount of capital and energy is now actively engaged in this enterprise, and the establishing of an oil exchange is talked of, for the exclusive manipulation of oil stocks.

PRINCIPAL TOWNS.

The principal towns of Los Angeles County are Los Angeles, Anaheim, Wilmington, Downey City, Compton, Santa Monica, Soledad, El Monte, Los Nietos, Santa Ana, San Juan, San Fernando, San Gabriel, Spadra, and Orange; also Tustin City, Newport Landing, Duarte Settlement, Azusa, Artesia, Centinela Colony, Westminster Colony, Cienega,, and Ballona. Many of these are embryotic towns or settlements, and at the present time amount to but little, except prospectively.

LOS ANGELES

Is the largest town and county-seat of Los Angeles County. It differs somewhat from most of the cities grown on California soil, even in its foundation, as the great majority of them are an outgrowth either of the peaceful missions or were ushered into life amidst the bustle and swagger of the military presidios. This site was selected by men who, tired of the monotony of the gar-

rison, sick of the turmoil of strife, weary of the forced march and long night watch, pined for a life-long asylum, a home. Worn out and disgusted with a hard and unremunerative service, this spot they dedicated to their household gods, and the experience of nearly an hundred years of settlement has honored their choice.

The city site originally comprised some sixteen square leagues. It was reduced to four square leagues by a Land Commission appointed by act of Congress. It is situated in a narrow valley, less than a mile in width. The Los Angeles River flows through the San Gabriel plain, on the east of the city, furnishing abundance of water for irrigating purposes, through the medium of intersecting ditches ; also furnishing the supply needed by the inhabitants of the city for domestic purposes.

It is stated that there are forty miles of ditches devoted to the public use for irrigating purposes, conveying the water from the Los Angeles River and distributing it throughout the municipality. In addition to this, is about the same extent of private canals, constructed by owners of lands which take their water from the main ditches, diffusing it over their private grounds.

The valley in which the city of Los Angeles is situated, is formed on the west by low hills, buttresses of the Santa Monica Mountains, distant about forty miles ; and on the east by the rising land of the San Gabriel Plain.

Los Angeles city is one of the oldest in the State. The old Mexican portion of it extends about a mile up the valley, but it has lost its distinctive features. To a great extent the old adobe flat-roofed structures, smeared with asphaltum, surrounded with broad verandahs or high walls, have been jostled from existence to make way for the more sightly, pleasing, and convenient structures of the American.

In 1874, the population of Los Angeles was twelve thousand. Its increase since that date has, without doubt, been greater than that of any interior town of the State. For the same year it was assessed upon a valuation of its property at $4,700,000. It has at the present time in the vicinity of 15,000 inhabitants.

It is about twenty-one miles inland from the coast; San Pedro, or Wilmington, its more recent name, being its port of entry. It is altogether likely, however, that the new town of Santa Monica will hereafter receive a portion of the shipping business now granted alone to Wilmington, as it is a good port, and lies nearer to the city of Los Angeles.

RAILROADS.

Five branches of the Southern Pacific Railroad center at Los Angeles, the Wilmington branch extending South twenty miles; the Anaheim extending Southeast thirty miles; the Spadra branch, fast increasing its extent, in an easterly direction, with San Bernardino as its immediate objective point; the San Fernando branch running twenty-one miles North, and the Santa Monica branch running some twelve or fourteen miles nearly due West. The management of the road is very highly spoken of, and both fares and freights are placed at such figures as seem to give general satisfaction.

STAGE LINES.

The Coast Stage Line runs from Anaheim, (the nearest point of railroad connection with Los Angeles,) to San Diego by way of Santa Ana, Tustin City, San Juan Capistrano, Las Flores, San Luis Rey and Soledad. The coaches run daily, the fare is ten dollars, and the trip requires twenty-four hours. The Los Angeles and San Bernardino stages leave the former place daily for San Bernardino, connecting with the Southern Pacific Railroad at Spadra. Another line to San Bernardino runs its stages by way of Chino, Rincon and Riverside, carrying the United States Mails and Wells, Fargo & Co's Express. The days of departure from Spadra are Tuesday, Thursday and Saturday, at eight A. M. Two lines of Stages are also running to Panamint, the new mining district. From San Francisco to Los Angeles, one has the choice of four well conducted lines of transit. By water, the Goodall, Nelson & Perkins Steamship Line, or the vessels of the Pacific Mail Steamship Co. By land, the Southern Pacific Railroad and Coast Stage Line, and the Southern Pacific Railroad and Telegraph Stage Line.

The vessels of the Goodall, Nelson & Perkins Steamship Company ply between San Francisco and the Southern ports. Their vessels are well officered, and the character of their passenger accommodations above reproach.

Los Angeles has a High School, under the supervision of a gentleman having had many years' experience as a teacher. There are also eight graded public schools in the city, under the conduct of efficient teachers. The Sisters of Charity have a day and boarding school for young ladies, with fine grounds and costly buildings. St. Vincent's College is also located here, an institution of learning for males, but whether as supplementary to institutions granting degrees, or itself granting degrees, we do not know; it is conducted by the priests of the Mission Congregation.

Ten religious denominations are represented in the city, each having a large congregation. Many of the church edifices are finely constructed, handsome buildings, which add much to the appearance of the city. Los Angeles has an infirmary of good capacity, is fully represented in the various social, secret, and benevolent societies, has a public library, some three or four banks, street railways, public buildings which would do credit to any community, and, in fact, all the ameniities of existence usually only enjoyed to the full by the people of large cities.

LOS ANGELES NEWSPAPERS.

In proportion to its population, no city in the State publishes a greater number of newspapers. It supports three dailies, each of which issue a weekly, the *Herald*, *Evening Express*, and *Star*. One semi-weekly, the *La Cronica*, and two weeklies, *The Mirror* and *Süd Cal. Post*, are also published. The dailies are published in English, the semi-weekly in Spanish, and the weekly in German. The Daily and Weekly *Herald* are among the leading papers of Southern California, and have at least as large a circulation as any of their cotemporaries. In addition to those already enumerated, there are also one weekly advertising sheet and two monthly publications, each of which has a large circulation.

The *Herald* has been actively engaged in furthering all legitimate immigration schemes, and has disseminated as much information among Eastern people regarding Southern California, as any paper in the State. We are indebted to the "*Herald* Pamphlet," issued by the *Herald* Publishing Company, for much intelligence which we could not otherwise have obtained without exceeding difficulty, and considerable expense.

Los Angeles, a New York or San Francisco in miniature, possesses the conveniences and advantages of those cities, though in less grand proportions; emulating their energy and comparing favorably with them in the possession of an enlightened enterprise, endowed with vigorous vitality.

NURSERIES.

Los Angeles is, *par excellence*, the nursery county of the State. Among the most noteworthy nurseries of the county are those of Thos. A. Garey, D. C. Hayward, J. C. Wallace and J. M. Vignes. Mr. Garey is proprietor of the semi-tropical nurseries, in the environs of Los Angeles city, where he carries the largest and most complete stock in the State. He has full assortments of temperate climate fruit-trees, including apple, peach, pear, etc., beside the best varieties of semi-tropical fruit-trees.

The largest orange orchard in Southern California has recently been planted just south of Los Angeles, within and adjoining the city limits. The orchard covers one hundred acres, and comprises 7,500 four-year-old trees. These trees will all be budded the present season with some of the choicest varieties of orange now growing in the State. There are several grafted orange trees now bearing in this county, but there is not an orchard of grafted orange trees in the State. Grafted trees bear much earlier than seedlings, and of course the fruit is much superior. Between the orchard trees, above mentioned, is being planted out a large semi-tropical nursery, consisting of orange, lemon and lime trees. The nursery is about half planted, and will comprise 750,000 yearling trees, just taken from the seed beds and put out in nursery shape. This nursery and orchard is the property of the Co-operative Nursery and Fruit Company, of which Thos A.

Garey is President, and H. J. Crow Superintendent. Mr. Garey has a national reputation as a semi-tropical nurseryman ; at the close of 1876 he will turn over his entire business to the company, whose nursery will then take the lead in that line of business on this coast. The grounds are situated between Main and San Pedro Streets, below Jefferson, and contain 298 acres. The San Pedro street railroad will soon be built to the corner of the nursery grounds.

D. C. Hayward is proprietor of the Richland Nurseries, located at Orange. He is making a specialty of grafted orange and lemon trees, and is keeping on hand a full variety of temperate climate fruit trees, as well as the eucalyptus species in many varieties, and ornamental tree stock of every kind; also all kinds of flowering shrubs.

The San Gabriel Nursery is owned and conducted by J. C. Wallace, and is one mile Northwest from the town of San Gabriel. This gentleman has orange trees in seven varieties, Australian blue gum trees, the Monterey cypress, and a full variety of ornamental and flowering shrubs, rose trees, etc. Northern fruit trees of every known description, as well as all varieties of the semi-tropics, are to be found here.

J. M. Vignes' nursery is situated three miles South of Los Angeles. It consists of thirty-five acres of most arable land, fifteen acres of which are planted entirely in trees. On his property are ten acres of bearing trees, and twenty acres of foreign vines. All standard varieties of fruit trees can be found here, as well as cuttings from all choice varieties of foreign grapes. Mr. V. also manufactures all brands of wine from his own grapes.

The Pacific Salt Works, owned and conducted by Mr. J. B. Trudel, are situated eighteen miles west of Los Angeles. These works can turn out in the neighborhood of from 2,500 to 3,000 tons of salt per annum, if worked to their full capacity. The salt is made by the process of solar evaporation, from six lagoons of a depth varying from six to eight inches. In addition, also, are ten large vats, yielding from four to five tons fortnightly. The yield from the lagoons is from 600 to 800 tons tri-annually. Fresh water is struck upon this property at a depth of twenty-three feet. The largest spring flows 10,000 gallons per diem, of excellent water. The article of salt produced here is pronounced equal to any offered for sale in the State.

ANAHEIM

Is situated thirty miles from Los Angeles, and at a distance of twelve miles from the coast.

It was founded in 1857.

This is one of the wealthiest and most successful colonies in the State. The property, which was purchased at $5.00 per acre, is now held at from $300 to $500 per acre. Over sixty vineyards are owned by the residents of this locality, all in good bearing, furnishing a product which has warranted the establishment of from six to eight wine-manufacturing establishments. Many orange and lemon groves are also in this settlement. All the fruits and grains in common growth in Southern California, are said to thrive well here. The soil is sandy and rich, and the climate invariably mild.

Anaheim contains two hotels, three church organizations, a graded school, with primary, intermediate and academic departments; two livery stables; eight stores and groceries; and above twenty shops and places of business not included in the above.

During last year over thirty buildings were erected, at an aggregrate cost of $100,000. The railroad was recently completed to this town, connecting it with Los Angeles. A project is on foot to erect at this point an hotel, the total cost with the ground to amount to $40,000. A new ditch is also talked of, from the Santa Ana River, with capacity sufficient to irrigate 30,000 acres.

The land in the vicinity of Anaheim is well adapted to all agricultural purposes.

Anaheim Landing, on the coast, is the shipping point for this district.

WILMINGTON

Was incorporated in the latter part of March, 1871. The town is one mile square, and has a population numbering about 650.

The soil of this vicinity is a dark, sandy loam, producing hay, corn, rye, oranges, potatoes, and all varieties of garden vegetables.

The manufacturing interest here is represented by a carriage shop, furniture factory, and wool-grading house.

The best of drinking water is obtained at a depth of four feet below the surface.

One newspaper, the *Wilmington Enterprise*, is published weekly.

It lies South from Los Angeles twenty-two miles, with railroad connection, two or three trains moving between these points each day. Anaheim lies to the East, twenty-four miles; Point San Pedro, four miles South.

The Wilson College is located here, established under the patronage of the Los Angeles South Methodist Conference, and incorporated in the fall of 1874.

Mr. B. D. Wilson granted to this institution ten acres of land with several buildings, those used formerly as the hospital and barracks for government soldiers. The college has a faculty composed of four professors, with an average daily attendance of seventy students.

There are several very tasteful residences here, those most worthy of mention being Mr. B. D. Wilson's and General Banning's. Mr. Wilson is devoting much attention to the growing of fruit and grapes upon his place. In front of his house he has 3,000 trees of the eucalyptus species, known as the Australian blue gum. It was also his intention to plant fifty acres to this variety, 400 trees to the acre; if he has not already done so, the project is simply delayed—not abandoned.

Wilmington is the shipping port for Los Angeles, San Bernardino, and Inyo counties, as well as portions of Arizona. The breakwater, constructed by the United States Government, is working satisfactorily, and the fact that a deep and permanent channel can be dredged is fully established.

In the near vicinity of Wilmington about 100,000 acres of land are held by speculative parties, who refuse to subdivide and sell to settlers on reasonable terms. This is a ruinous policy in a young community, as instead of attracting it will repel immigration, and through the communication of the disappointed immigrant with those contemplating immigration, the prejudice will be disseminated and many will be forewarned against such communities, which will result in their seeking homes elsewhere.

The Los Angeles and Wilmington Railroad gives employment to some two hundred men, at the Wilmington end of the road.

The railroad wharf is a finely constructed piece of work, 1,200 feet in length, with substantial warehouses.

The Co-operative Association has a fine wharf, built during the year, which, together with the warehouses, cost $20,000.

DOWNEY CITY

Is the shipping port for the Los Nietos section, of which it is also the principal town. It was for some time the southern terminus of the Anaheim branch of the Southern Pacific Railway, previous to its continuation to Anaheim. Its population amounts to about 250. Its foundation was occasioned by the necessities of commerce. It is sustained by a rich outlying agricultural district.

The section of country termed Los Nietos lies in the valley of the San Gabriel River. It covers an extent of country about thirteen miles in length by ten in width. The land is level, with an uniform slope toward the ocean on the southwest; the soil is rich and strong, and the facilities for irrigation are unexcelled, the water of the San Gabriel River being sufficiently plentiful to irrigate more than twice the area of this valley.

We append some information relating to this section from a recent issue of the *Downey City Courier:*

Two crops can be and are frequently harvested in the same year—one of corn and one of barley. A large area of the valley is moist land, requiring no irrigation, and ample facilities are at hand to irrigate land which may require it. All the semi-tropical fruits flourish and do as well in our valley as in any other section of the county. Tobacco is now being cultivated quite

extensively, and at this time gives promise of becoming a staple production and a leading industry. The sugar beet can, and would, be extensively cultivated were there a market for the production. By a test, made at the beet sugar refinery, at Sacramento, the beets grown in this valley were found to contain two per cent. more saccharine matter than those grown elsewhere.

The following are some of the exports by railway for four months, much of the produce of the valley having been sent to market by wagon:

JANUARY.—Corn, 6,177 sks., 726,426 lbs.; Rye, 170 sks., 19,560 lbs.; Barley, 856 sks; 88,529 lbs.; Bran, 55 sks., 3,891 lbs.; Meal, 112 sks., 4,050 lbs.; Potatoes, 10 sks., 1,026 lbs., Mustard Seed, 62 sks., 5,510 lbs.; Oats, 26 sks., 1,967 lbs.; Bees (stands), 40, 2,227 lbs.; Assorted Packages, 81 sks., 5,773 lbs.; Lumber, 1,000 feet, 3500 lb.; Hogs, 149, 47,240 lbs.; Total weight, 909,749 lbs.

FEBRUARY.—Corn, 8,064 sks., 906,759 lbs.; Barley, 282 sks., 27,077 lbs.; Ru. Barley, 150 sks., 18,035 lbs.; Potatoes, 44 sks., 4,385 lbs.; Crk. Corn, 228 sks., 22,615 lbs.; Bran, 101 sks., 5,942 lbs.; Meal, 1,033 sks., 37,175 lbs.; Assorted Packages, 68 sks., 7,955 lbs.; Lumber, 595 feet, 1,932 lbs. Total weight, 1,031,925 lbs.

MARCH.—Corn, 3,658 sks., 407,941 lbs.; Barley, 505 sks., 45,730 lbs.; Crk Corn, 232 sks.; 23,200 lbs.; Bran, 91 sks., 6,480 lbs.; Gra. Flour, 188 sks., 4,875 lbs.; Meal, 605 sks., 20,175 lbs.; Bales Hay, 110, 20,465 lbs.; Assorted Packages, 94, 7,167 lbs.; Ft. Lumber, 9,188, 32,188 lbs. Hogs, No., 735, 147,000 lbs. Total weight, 715,221 lbs.

APRIL.—Corn, 2,207 sks., 260,522 lbs.; Barley, 161 sks., 16,194 lbs.; Crk. Corn, 141 sks., 14,100 lbs.; Meal, 288 sks., 8,400 lbs.; Potatoes, 9 sks., 951 lbs.; Assorted Packages, 80 sks., 4,654 lbs.; Stds. Bees, 46, 2,808 lbs.; Lumber, 1,935 feet, 5,864 lbs. Total weight, 313,493 lbs.

COMPTON

Is situated on the line of the Los Angeles branch of the S. P. R. R., twelve miles South from Los Angeles, and ten miles North from Wilmington.

The town derives its name from Mr. G. D. Compton, one of the pioneers in the settlement of the State, and an enterprising business man. This is a town of about seven years' growth, and within that time has grown up from a very wilderness to a prosperity which will be as lasting as it is thorough. It relies upon a fruitful soil for all the advantages which may accrue to it, and possesses many attractions of climate, etc.

The breeze from the ocean tempers the atmosphere, it being sufficiently removed from the coast to escape the fogs and dampness which the breeze does not carry so far inland.

Artesian water is obtained at the moderate depth of from ninety to one hundred and fifty feet; there are over seventy-five wells flowing in this locality.

Immediately in town the land is low, containing a good deal of alkali, with considerable adobe also. All the country to the West, however, is a rich loam, while on the East the soil is sandy, but rich.

All the cereals yield well, also potatoes and vegetables.

Mr. Compton is identified with the settlement, and is holding large tracts of unimproved land, for sale at from $20 to $40 per acre, in any desired quantity, of good quality.

The settlement comprises about one hundred families, and supports a graded school, with a daily attendance of one hundred pupils.

The town contains one hotel, store, post office, blacksmith shop, school-house, Methodist church, and the S. P. R. R. depot.

Two societies are represented here, the Good Templars and Grangers.

Liquor is excluded from the settlement.

SANTA MONICA

Is the most delightful sea-side resort on the Pacific Coast. It lies sixteen miles Southwest from the city of Los Angeles, in a narrow valley opening on the sea, well grown with sycamore and oak.

It has been the custom for people from Los Angeles to visit this place in the summer season, taking tents and cooking utensils, spending days and weeks in its pleasant locality. During the summer just past lots were sold at auction, the sales being ready, at good prices. An hotel has been recently built of large capacity; also bath houses, a wharf, and the community is now an exceedingly active and hopeful one. The place has positive advantages as a port of entry, also, and bids fair to divide the shipping business with the port of Wilmington.

EL MONTE

Was the first American settlement in the county. It is twelve miles East from Los Angeles, on the line of the Los Angeles railroad. The San Gabriel River bisects the town, forming two little villages, which are essentially one in every respect save this accident of topography.

Considered together, it contains two hotels, four stores, four blacksmith and wagon shops, four saloons, two churches, Baptist and Methodist; a good graded school, an express, telegraph and post office.

The farms are generally small, irrigation being unnecessary from the fact of the low-lying position of the land, and its consequent moisture.

Little attention is paid to the cultivation of cereals, with the exception of corn, potatoes being the principal product, it being more celebrated as a potato-raising country than any portion of Southern California.

The thermometer here sometimes reaches 100°, and in winter a thin ice is quite frequently seen.

Improved land is worth from $20 to $40 per acre.

The precinct has a population of about 1000.

SANTA ANA

Is a prosperous and pretty village, thirty-three miles South from Los Angeles, eight miles distant from the ocean, and six from Anaheim. It was founded about 1871. The settlement contains about 15,000 acres, light adobe and sandy loam soil, about one-half of which is under cultivation. Irrigating ditches from the Santa Ana River convey an abundance of water for all purposes, and, as a provision against emergencies, about a dozen artesian wells have been sunk.

The location of Santa Ana could not be improved, and its prosperity is ably abetted by a rich surrounding soil and an equable climate, its average temperature for 1874 being 65°.

Just below here is the fertile district of Gospel Swamp. It is almost impossible to find general belief for the crop statistics coming from sections so rich in production as this and the Los Nietos districts, let them be ever so well attested. We forbear appending such information for this reason alone, and can only request the unbeliever, who is desirous of cultivating the quality known as credulity, to visit these localities during some harvest season.

Gospel Swamp land is worth from $75 to $100 per acre.

In the locality of Santa Ana, in fact, where the settlement is now situated, land which five years since could have been purchased at from $5 to $10 per acre, is now worth from $40 to $60.

The town has one hotel, four stores, and a good school.

SAN JUAN CAPISTRANO

Is thirty miles from Anaheim, toward the coast, on the main road between Los Angeles and San Diego. The valley in which this town is situated, is about nine miles in length by less than one mile in width.

The San Juan, a never-failing stream, passes through its entire length, furnishing an abundant supply of water.

Rich grasses, fine timber and dense underbrush grow luxuriantly throughout the entire valley, attesting the richness of a soil which unfortunately is but little cultivated.

The population aggregates somewhere from six to eight hundred, made up almost exclusively of Indians, Mexicans and native Californians, there being comparatively few Americans or Europeans in the place. It is the most thoroughly Mexican town in the State, the prevailing

architecture being the low, flat-roofed adobe structures, the streets being laid out without any regard to regularity.

THE SAN JUAN CAPISTRANO SPRINGS are twelve miles from the Old Mission or town of San Juan, on the stage road to San Diego. The springs have a very abundant flow of water; from some the water is as soft as rain-water. The variation in temperature is very great, ranging from nearly the freezing point to an extreme heat of from 90° to 130° Fahrenheit.

The ravines and canyons surrounding the springs, are profuse in the growth of trees and shrubbery, furnishing pleasant walks and drives. Their curative properties are highly spoken of.

SAN FERNANDO

Was organized April 15th, 1874. The first regular passenger train reached the town from Los Angeles, the day the organization was effected. It is twenty-two miles North from Los Angeles. But little more than a year since the whole section was a vast sheep range, known as the San Fernando Grant. Identical with the completion of the railroad to this point, land was divided and sold in small tracts, and a town site laid out. The blocks are 400x600 feet, with streets from sixty to eighty feet wide. The railroad forms the Eastern boundary of the town.

The town site consists of about 11,000 acres, the old mission grounds being included. When founded, it contained but one house besides the mission buildings; it now has above thirty buildings. Water is furnished from a large spring one and one-quarter miles Northwest, with a capacity of about two hundred inches, the only living water in the valley in dry seasons.

The town contains two very good hotels, two merchandise stores, six saloons, one saddler's shop, two blacksmith shops, one shoe shop, one barber shop, one carpenter shop, and a feed stable.

The population numbers about one hundred and twenty-five. The school is at Lopez Station, two and one-half miles Northwest.

The elevation of San Fernando is 1,050 feet above Los Angeles; above the sea 1,210 feet. The distance to Wilmington is forty-two miles.

The Telegraph Stage line passes through here en route for Caliente, Kern County, one hundred and three miles distant. The stage is daily, with an extra three times per week.

The valley of San Fernando is about ten miles in width by twenty in length.

SAN GABRIEL

Is on the line of railroad to Spadra. It is a small village, situated in a magnificent valley of the same name. This valley is the great grape and fruit-growing section, in which are so many famous orchards, mentioned elsewhere.

Near the boundary of the valley close upon the railroad station, is located the old mission of San Gabriel.

The village of San Gabriel contains a church, hotel, school, two or three stores, etc. In the valley are some of the finest residences in the county.

SPADRA

Is situated in the valley of San Jose, which contains a population of about one thousand.

The San Bernardino branch of the S. P. R. R. has just been extended beyond this point, which for some time has enjoyed the commercial advantages usually resulting to a railroad terminus.

Spadra is thirty miles East from Los Angeles, and has grown up within the past year. It is quite a village, comprising a school-house, hotel, three stores, butcher shop, three blacksmith and wagon shops, and quite a number of dwellings. The valley in which it is situated is a beautiful and fertile one. Much is being done here in the way of growing fruit from the seed, and in introducing new exotic growths in trees.

TUSTIN CITY

Is a pretty little village, the site of which was purchased by Mr. C. Tustin in 1867. The settlement in which the town is situated, is East of Santa Ana, and some twelve miles from the ocean, and comprises about sixty farms of from twenty to forty acres each.

It was founded about two years since. Water can be obtained by artesian wells, or by ditches from the Santa Ana River, but a short distance away.

The soil is a sandy loam, producing large quantities of cereals, of good quality. Tobacco is successfully cultivated.

There is a good school in the settlement, and three religious denominations are represented.

NEWPORT LANDING

Accommodates, with respect to shipping facilities, all the country lying East of Santa Ana.

Quite a bay is formed here, by a little inlet, which small sailing vessels and some of the smaller coast-wise steamers can readily enter. Santa Ana lies eight miles away.

DUARTE SETTLEMENT.

This settlement is in the upper San Gabriel Valley. It is sheltered from severe winds and frosts by the San Gabriel Mountains, at whose foot it lies. It embraces 2,000 acres of land; has a population of about one hundred, and a school with an average attendance of about thirty pupils. The settlement is about two years old. For fruit-growing, and for the purposes of the general cultivator, this locality cannot be surpassed. The San Gabriel River furnishes an almost inexhaustible water supply to this vicinity.

The land owned by Mr. Jones, referred to elsewhere, is in this neighborhood.

The San Gabriel mines are five or six miles above, in the canyon; their promise is favorable for large returns, the prospects being quite flattering.

This town is seventeen miles from Los Angeles, and five miles from El Monte railroad station.

AZUSA

Settlement is about five years old, and occupies a valley by itself, or rather a continuation of the San Gabriel Valley, that portion lying East of the San Gabriel River. It is well sheltered on three sides: by the San Gabriel Mountains on the North, and a chain of hills on the East and South. It is about five miles from Duarte, and ten miles from El Monte. It embraces about twenty-four square miles, and in every respect is as lovely a valley as one could wish to see. In the valley is a profusion of trees, scattered throughout the landscape, singly and in groups. The trees are mostly oaks, and in addition to lending a charm to the surroundings, they furnish an ever ready supply for domestic uses, as well as for manufacturing interests. The water supply is derived from the San Gabriel River.

About one hundred farmers occupy and cultivate the valley, their farms averaging from forty to eighty acres.

Here is a post office, and a good public school.

The climate is excellent. The extreme range of the thermometer is from 34 to 98°.

The soil is very productive, and is a sandy loam unmixed with either alkali or adobe. The production here is marked by a diversity one seldom sees equaled, everything which is adapted to the climate and soil of Southern California finding representation. The Western portion of the valley is to be apportioned as a school district, which will be called "Walnut Grove."

ARTESIA

Is a very young settlement, recently sold in blocks of forty acres, and in town lots, by the "Immigration and Land Co-operative Association." The tract embraces 3,500 acres. The soil is a sandy loam, rich, and irrigable through the instrumentality of artesian wells, which can be easily and cheaply sunk. It is seventeen miles from Los Angeles, and three miles South from Norwalk

station, on the Anaheim branch. Its location could not be improved upon. The association, mentioned above, took the initiative in the water prospecting, by sinking a well upon the plaza, and donating it to the town, whose existence is yet prospective. They also erected a building two stories in height, at a cost of $4,000, for school, church, and public purposes. Each room is 31 x 36 feet, while the building is surmounted by a tower fifty-two feet in height.

WESTMINSTER COLONY

Is about half way between Anaheim and the ocean. It was organized by Rev. L. P. Webber, in 1871. To secure high character and harmony from the start, those only were invited to join it who would pledge themselves not to sell or make intoxicating liquors, and who could feel at home in a Presbyterian church and would assist in its support.

The Colony consists of about seventy-five families.

There are nearly one hundred artesian wells in the Colony and immediate vicinity, and three sets of well tools are kept constantly busy. The depth of the wells varies from sixty-five to nearly two hundred feet, and the average flow is sufficient to irrigate sixty acres.

The Colony has two stores, one a co-operative store, doing a large business with all the surrounding country, and the other a private enterprise also doing well and attracting a large trade. There is also a blacksmith, harness, butcher shop, and cabinet warehouse. Other trades are also represented. In location the Colony is the nearest settlement to Anaheim Landing and the proposed Bolsa Chica Wharf.

The high character of its people, the abundance of pure artesian water, with the good quality of its lands and temperate climate, all contribute to its rapid and healthy growth.

The area appropriated to the Colony is about 10,000 acres, much of which is perfectly adapted to fruit culture, and much specially adapted for dairy farms. Barley and corn give very large crops. Potatoes are made a specialty. Eggs and chickens are exported in very large quantities, probably in excess of any other single place on the Coast. Several dairies are also exporting butter and cheese, and a vegetable farm, conducted by Chinamen, supplies Anaheim in part and much of the surrounding country.

Anaheim is six miles distant, the coast seven. It has a good school house, averaging an attendance of one hundred pupils.

CENTINELA COLONY,

A Land Company, has purchased 25,000 acres of the choicest farming and fruit land in the State, for colonization purposes. It touches the limits of Los Angeles city, and occupies an interval lying between it and the coast. It is almost exclusively valley land, and produces abundantly of all kinds of grain and semi-tropic fruits. Wheat has been grown upon this land, and orange and lime trees are now in full bearing, one orchard containing 8,000 orange, lime, lemon, and almond trees. A nursery, located here, contains about as many more in various stages of perfection.

The northern portion of the tract is watered by the Centinela Creek, and on any portion of it water can be obtained by boring from 25 to 50 feet.

The climate varies but little from 60° through the entire year.

It is the intention, in pursuance of the original scheme adopted by the colony, to distribute the land, with all improvements of orchards, stock, etc., among the shareholders, each share entitling the holder to a thousandth part of the whole.

Each shareholder purchased his land, including his share in the improvements, live stock, etc., at $12 per acre. A division is made of the land into 5, 10, 20, 40, 80 and 160-acre lots, which were to have been sold some months since. The excess of the amount realized from the sale above the cost of the land was to be divided among the shareholders.

Large grants were made by the company to found a college and schools. The charter of the association forbids the erection of saloons, or the sale of intoxicating liquors.

A railway, to extend through this land from Los Angeles to the ocean, is talked of.

CIENEGA AND LA BALLONA.

These valleys are contiguous, and contain flourishing settlements.

The Cienega is ten miles long and three in width.

La Ballona is ten miles in length, with a width of four miles. The characteristics of soil and climate are similar in these valleys. Water lies near the surface, and the lands, sloping gently from the mountains to the sea, furnish fine stock ranges. Grains of all varieties flourish, and all kinds of fruit except the orange; also vegetables of every description.

ORANGE

Lies six miles south from Anaheim. It embraces an extent of country five miles in width by ten in length. The Santiagos River runs diagonally through it. It is a level and beautiful tract, rich in soil, and possessing a natural moisture rendering it almost independent of artificial irrigation. The growth here is almost spontaneous; all fruits and grains thrive, achieving wonders in production.

The growth of the settlement has been very rapid; two years since there were scarcely ten houses in the settlement, where are now in the vicinity of two hundred.

The land is divided into blocks containing 40 acres.

The town has two churches, a good school, with three departments ; a Grange store, express and post office, all centrally located. Saloons and the sale of liquors are tabooed.

The temperature is mild, the range of the thermometer being lowest 40°, highest 98°. There are no hurtful frosts, and tomatoes and tube-roses bloom all winter in the open air. Water facilities are ample.

Dr. A. B. Hayward's nursery is located here ; Mr. James Huntington also has an interest of that character in the locality.

VINE HILL
VINEYARD
Santa Cruz County, Cal.
GEO. M. JARVIS,
PROPRIETOR.

This famous Vineyard is on the South side of the Coast Range of mountains, about twelve hundred feet above the sea, and some ten miles distant from it. The climate is the best in the state. The view from the residence of Mr. Jarvis, embracing within its scope over ninety miles of land and sea, is pronounced by travelers to fully equal in picturesqueness the view from Vesuvius of the Bay of Naples.

The estate contains four hundred acres, of which about one hundred are devoted to the growth of Fruits, Nuts, etc., etc., the Grape being the main product; yet Apples, Pears, Peaches, Plums, Nectarines, Quinces, Cherries, Figs, Almonds, Chestnuts, Limes, Pomegranates and Oranges thrive, and bear abundantly in the open air.

The Proprietor uses great care in the manufacture of his

WINE & BRANDY.

Having the best possible location, and having planted nothing but the choicest varieties of grapes, for Wine-making purposes, his advantages are superior. His cellars are very large, and are stocked with

Grape, Apple, Peach and Cherry

Brandies, with

PORT, SHERRY, MUSCATELLE,

ANGELICA, CLARET,

BURGUNDY, WHITE WINE AND WINE VINEGAR.

He invites the inspection of the **TRADE and PUBLIC** generally to his large stock, and assures all his visitors a hearty welcome.

J. B. TRUDEL,

PACIFIC SALT WORKS.

These Works are situated 18 miles west of Los Angeles, Los Angeles County, Cal.

The Salt is manufactured from six lagoons, of a depth of from six to eight inches, capable of evaporating from six to eight hundred tons of salt three times per year.

THERE ARE ALSO TEN LARGE VATS, WHICH YIELD FROM

Four to Five Tons once in Two Weeks.

Fresh Water is had at a depth of twenty-three feet; one spring, probably the largest on the property, flows at the rate of 10,000 Gallons per day, the water being excellent in quality.

THE SALT PRODUCED HERE IS PRONOUNCED

Equal to any offered For Sale

IN THE STATE.

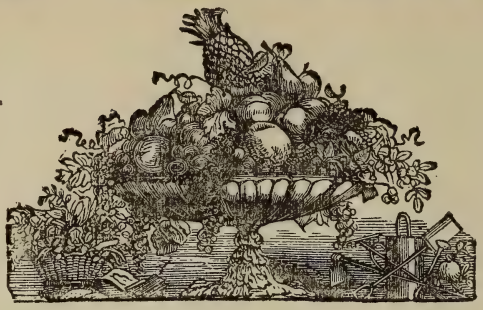

A fine house occupies a commanding site, with a good barn and other necessary buildings.

SAN FRANCISCO.

W. H. J. BROOKS,

EXAMINER OF TITLES.

ABSTRACTS OF TITLE

To RANCHES, COUNTY LANDS AND CITY LOTS, showing every transaction, from the earliest dates to the present time, prepared with accuracy and dispatch.

In the course of his business during the past year, Mr. Brooks has investigated the title of most of the ranches of this county, as well as many lots and tracts in the city. The abstracts of all these have been preserved, and form already quite a large collection.

He is also preparing a PROPERTY INDEX OF THE ENTIRE COUNTY OF LOS ANGELES, which, to the extent to which it is completed, affords an additional safe-guard, for certainty.

Conveyancing in all its Branches.

OFFICE IN ALLEN'S BUILDING,

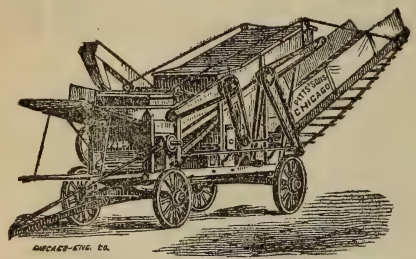

CORNER SPRING AND TEMPLE STS.

(UP STAIRS) LOS ANGELES.

THE IMPROVED WOODS' EAGLE MOWER

GARDEN CITY CLIPPER PLOWS AND CULTIVATORS.—We have a full assortment of this only Cast Steel Plow that comes to the market, and the thousands now in use in California and Oregon prove their superiority.

Studebaker Farm and Spring Wagons; Eagle Hay Presses; Chisel Cultivators; Friedeman Harrows; Furst & Bradley Sulky Rakes; Seed Sowers; Feed Cutters, &c. And a full a line of Hardware and Cutlery. Rumsey's Force and Lift Pumps; Hydraulic Rams; Church, School and Farm Bells.

PLEASE SEND FOR CATALOGUES AND PRICE LISTS.

A GENERAL DESCRIPTION

OF

SAN DIEGO COUNTY

San Diego, the extreme Southern County of California, is bounded on the North by San Bernardino County; on the East by Arizona; on the West by the Pacific Ocean; and on the South by Lower California. It has an extreme length of one hundred and sixty-two miles, by a breadth of one hundred and two, giving

AN AREA,

In square miles, of sixteen thousand, five hundred and twenty-four; or, in acres, ten million, five hundred and seventy-five thousand, three hundred and sixty. Of these acres, about two million, five hundred thousand are occupied by the Colorado Desert; of the residue, some four million may be said to be appropriated by the mountains and canyons; leaving a handsome remainder of four million, seventy-five thousand, three hundred and sixty acres, stretching out in fertile plain, or, as valleys, niched among the fastnesses of the Coast Range, fruitful in soil, irreproachable in climate, adapted to all the requirements of agriculture or grazing.

THE POPULATION

In 1870 amounted to four thousand, nine hundred and fifty-one, since which time the increase is thought to have been fully one hundred per cent.

THE ASSESSED VALUATION

Of property for the current year is upwards of three millions. Two branches of

THE COAST RANGE

Extend across the entire County, from North to South, making three divisions, as distinct from one another, in soil, climate, and topography as though occupying different hemispheres.

THE DIVISION

Bordering upon the coast forms a strip, in width about twenty-five or thirty miles, of undulating valleys and gently sloping or level plains. Nearly all this land is well fitted for agricultural and grazing purposes, and is, to a great extent, unoccupied. The San Diego, San Luis Rey, Santa Margarita, Sweetwater, and other streams irrigate this slope. They have their sources in the branches of the Coast Range, some flowing through the entire year, others running dry during the summer season.

THE CENTRAL DIVISION

Is mountainous in character, is irregular in outline, and is about forty miles in width. It contains large tracts of good farming land, and the greater part of the finest grazing land in the County. Gold, silver, copper and other minerals have been found in both these ranges, at varions points. The mountains have heavy forests of oak, fir, pine, and cedar.

The Santa Ysabel District is distant from the town of San Diego, in an Easterly direction, about seventy miles. It is a succession of broad table lands, lying between the two main ridges of the mountains, at an elevation of between three and four thousand feet above the sea level.

The loftiest peak of these mountain ranges is the San Jacinto, variously estimated at from five thousand to eight thousand feet in height. It is the most fertile and richest portion of the County, better adapted to agricultural purposes in both soil and climate, and richer in the greater variety of its resources. Wheat, barley, oranges and grapes are among its products. The most rapid and greatest developments made within the limits of the County are being effected in this locality.

THE THIRD DIVISION,

Comprising the great Colorado Desert, lies Eastward of this mountain range. This desert extends to the borders of the State on the South and East. It is an arid plain, destitute of the slightest vestige of vegetation for miles along its Northern and Western borders. On the South and East, its soil finds fertility from contact with the waters of New River, which receives the overflow from the Colorado in time of freshets. The Gila and Colorado have their confluence near here, and upon the fact that the desert lies at a level below the waters of the gulf into which they empty, was once formed an irrigation scheme for reclaiming this waste district. Although the action of Congress was favorable to it, the project was abandoned. It is without doubt perfectly practicable, and will at some future day be carried into execution.

Near the boundary line towards Arizona, after crossing the New River, the appearance of the country undergoes a complete change. Instead of the shifting sand so recently left behind, there is a soil having a greyish tint, as firm and compact as brick, covered with a scanty growth of short, wiry grass, among which flourishes the cacti family in all its infinite and forbidding variety. The mesquite also grows luxuriantly in this district, giving it the appearance of a forest, as compared with the bare, sandy plains.

This is the storehouse from which the Indians of Arizona and Lower California draw their winter's supply of the nuts or beans of this tree.

The entire vicinity has a tropical appearance, the air being literally swarmed with paroquets, orioles, and other brilliant-plumaged birds.

THE PRINCIPAL VALLEYS

Of this County are the Tia Juana, Otay, Jamul, Sweet Water, Cajon, San Pasqual, San Luis Rey, San Diegnito, Santa Maria, Santa Ysabel, Ballena, Monserrate, Milquatay, Santa Margarita, Temecula, Warner's Ranch, and Valle las Viejas.

ITS PRINCIPAL RIVERS

Are of Sierra origin, and assist in irrigating the agricultural portions of the County. They are the Tia Juana, Otay, Sweet Water, Nacional, San Diego, San Diegnito, San Luis Rey and Santa Margarita. They generally fail during the dry season, although some of them present a water supply throughout the entire year. The wants of irrigation, beyond the supply thus naturally furnished, are subserved by artesian wells. The underground supply is abundant, the water being about the same temperature as rain. One well of good capacity is capable of furnishing all the water demanded by ten acres, under cultivation to fruit. A peculiar method of farming is resorted to in San Diego County, no less than elsewhere in Southern California. The rain-fall occurs within an unusually short period, subjecting them to a long interval of drought, but in any year the rainfall is sufficient to produce fair crops. Deep plowing is resorted to during the winter, the soil being thoroughly stirred. The earth thus retains its moisture for a much greater period than when the soil is only superficially broken. This moisture being retained, comparatively little rain is necessary to ensure an ample return in the product sought. Plowing and sowing occupies the interval from November to April.

VEGETABLES

Are successfully cultivated, by a trifling amount of labor, in the direction of artificial irrigation.

San Diego County has less rainfall than any other portion of the State, yet a smaller amount, if ocurring at the proper season, is necessary here to produce and mature grain and potato crops than elsewhere, it being stated that ten inches of rain will accomplish perfectly that which twenty inches fails in thoroughly effecting in the upper counties.

THE CLIMATE AND SOIL

Of this County are adapted to all fruits of a tropical nature. The orange, lemon, citron and lime seem to thrive well, and while in the valleys the frost may prove, to a certain extent, inimical to their growth, on the table lands they will meet with no such drawback.

THE OLIVE

Is raised in a perfection rarely met. The groves at the San Diego Mission yield more largely, and surpass in the size and the quality of their fruit those of any other locality. The trees are seventy-five years of age, but remain unimpaired in vigor and productiveness, are of thrifty growth, and yield a handsome income to their proprietors.

For olive culture this is without doubt one of the most favorable point in the United States. Much attention has been directed toward it for the past two years. In 1874, several thousand cuttings were planted in the vicinity of San Diego Bay.

THE FIG

Is also a profitable fruit for the cultivator in these latitudes. The planting of such an orchard is attended with but little expense, and from three to four crops have been gathered in one season from the same tree. An additional argument for its cultivation is also offered, from the fact that the climate, owing to the peculiar atmospheric dryness, presents unusual facilities for curing fruits.

One of the leading industries of this County, is the

BEE CULTURE.

The increase in the exportation in 1873, over that of the previous year, was one hundred thousand pounds, but a moderate increase after all, in comparison with what might be effected, did they exert themselves in this direction as fully as might be expected from the possession of advantages, which would seem to lead, by a natural process, toward what would be so easily accomplished.

SHEEP-RAISING

Is also beginning to attract especial attention. The export of wool for the year of "73" was six hundred thousand pounds.

SALT is manufactured from the waters of the bay.

HIDES are shipped raw, there being no facilities for tanning in the County.

Were a moderate amount of capital devoted to the legitimate purpose of erecting a manufacturing interest here, San Diego might become something more than a point from which to demand raw material. She might manufacture her own sugar from the sugar beet, the product of her own soil, and send her shipments to market pocketing the profits, instead of sending away the raw material and importing the manufactured article. The same may be said regarding the wool product, and the hide supply. But all this and perhaps more is lingering within her near future.

THE BAY OF SAN DIEGO,

Upon the Northeastern shore of which stands the present town of San Diego, the County seat, was discovered in 1542, by a Portuguese navigator, employed by the Spanish government. The ancient Pueblo covered the site of old San Diego as well as the present town. These two places, although generally considered to be identical, are separated by a distance of about four miles in the position of their settlements, although in the same municipality. This was the first settled portion of the State, the mission having been located in 1769.

San Diego, or Saint James, was selected as the name under which the new mission was established. That the locality still exists, and has given its name to both the County and the Bay, is no doubt altogether due to the fostering care of this, their tutelar saint.

The mouth of the harbor is about eighteen miles from the Mexican border. From here the distance to New York is four hundred and twenty-three miles less than from San Francisco. It also lies five hundred miles nearer China than San Francisco.

THE TONNAGE

Of the port in 1874 was 208,476 as opposed to 160,815 in 1873, being a gain in one year of 47,661 tons.

Following are the arrivals at the port during the year of 1874 : steamers, 220; brigs, 2; barks, 5; schooners, 34; sloops, 11.

Imports during 1874			33,510	tons freight.
"	"	"	2,837,475	feet lumber.
"	"	"	487,000	shingles.
"	"	"	302,200	laths.
"	"	"	130,125	shakes.
Exports for 1874			1,024,021	lbs wool.
"	"	"	431,498	" honey.
"	"	"	155,000	" salt.
"	"	"	84,000	" flour.
"	"	"	63,554	gallons wine.
"	"	"	31,600	" whale oil.
"	"	"	8,431	hides.
"	"	"	30,000	lbs. castor beans.

The mean temperature is 45°, the prevailing winds being from the West and Northwest.

At the time of the discovery of the Bay by Juan Rodrigues Cabrillo, in 1542, as before referred to, the name given to it was San Miguel. It was thus characterized until changed to its present name, in 1769, at the establishment of the old San Diego Mission, by the Franciscan Fathers. San Diego Bay has an average depth of twenty-two fathoms water, at low tide. The length of the Bay is thirteen miles from the entrance to its head.

With the exception of San Francisco this is the most commodious and safest port of the Pacific. Its width at the entrance is between six and seven hundred yards, and anchorage is good.

The steamers of the

GOODALL, NELSON & PERKINS S. S. CO.

Ply regularly between this and the port of San Francisco, doing the carrying in passengers and freight for this and all intermediate points along the coast.

THE MAIL SERVICE

To Los Angeles, a distance of one hundred and thirty miles, is by tri-weekly stages; that to Fort Yuma, one hundred and eighty miles distant, by weekly stage. The old town of San Diego not ministering sufficiently to the commercial necessities of this progressive age, has been left to its tumble-down fate, its adobe structures have been abandoned to the conservatives, while the business

element has reared for itself a new city, as American in its character as the old one was Spanish. Its situation is more advantageous, commercially speaking ; its residences are tasteful, handsome structures, an ornament to the city and an evidence of the cultivated taste and prosperous condition of the owners.

ITS WAREHOUSES

And other commercial and mercantile structures are commodious, and well adapted to the wants and uses of trade. Its wharves are extensive, and bear evidence of having been erected at large cost, nothing having been neglected which could add to their durability, or render them better fitted for the service to which they are dedicated.

THE POPULATION

Of San Diego approximates closely to three thousand. The anticipated construction of the Texas Pacific Railway, of which this is the terminal point, has given an impulse to enterprise in every direction, buildings of every description have been pushed to completion, and the entire population seem to be energized by a strong feeling of hope and confidence in their immediate future. Whether this feeling will be an abiding one, remains yet to be seen. It is to be hoped that the recent complications in the affairs of the Texas Pacific will not lead to a postponement, even, of their projected enterprise. The water supply of the city is derived from an artesian well, the supply being abundant.

San Diego is well supplied with schools, both public and private, and the religious element is represented by six churches of the following denominations: Baptist, Presbyterian, Methodist Episcopal, Episcopal, Unity Society, and Roman Catholic. It is also fully represented with social, secret, and benevolent societies. Two daily and weekly papers are published here, the *Union* and *World*. They are objects of local pride, well conducted, and correspondingly successful.

SAN LUIS REY,

So called in honor of Louis IX of France, a warrior of the time of the crusades, is near the harbor of that name, forty-five miles North of San Diego. It is situated in a beautiful valley of an area of twenty-five miles, through which passes the San Luis Rey river, a never failing stream. The old mission of the same name was situated in this valley some five miles distant, where now stands the town of Pala. The soil of the valley is very fruitful. The harbor of San Luis is insecure and little used.

TEMECULA,

North from Pala about forty-five miles, is a town of some little importance. The town is located on the bank of the Santa Margarita. The vicinity is well adapted for grazing purposes.

WARNER'S RANCH

Is a small town about forty-five miles from Temecula, in an easterly direction.

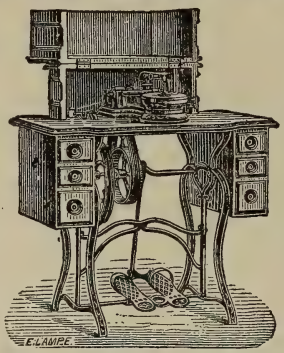

FORT YUMA, at the extreme Southeast corner of the State, is a military post. This is known as the Picachto mining district. Placer mines exist there to some extent. Mining is the principal resource of the settlers.

San Diego County, in its entirety, is rich in varied resources, which will find development only in a largely increased population.

THE NEW IMPROVED

FLORENCE

Agency Established on the Pacific Coast in 1863.

Side Feed and Back Feed.

THE LIGHTEST RUNNING, MOST SIMPLE, AND MOST EASILY OPERATED SEWING MACHINE IN THE MARKET.

Always in Order and Ready for Work.

If there is a FLORENCE MACHINE within one thousand miles of San Francisco not working well, I will fix it without any expense to the owner.

EXTRAORDINARY INDUCEMENT

FOR PEOPLE SEEKING HOMES

—IN—

SOUTHERN CALIFORNIA.

FOR RENT OR SALE,

CHOICE HOMES IN SAN GABRIEL VALLEY,

ACKNOWLEDGED TO BE THE

most desirable portion of Los Angeles county, Southern California, are offered to persons of moral worth and industrious habits, on terms to satisfy the most fastidious and within the reach of men of moderate means.

Having recently purchased

5,000 ACRES OF THE RANCHO AZUSITA,

Including the old Mexican homestead, beginning where the San Gabriel river emerges and extending Westerly along the Southern base of the San Gabriel mountains to within four miles of the Mission Church and Depot of the Southern Pacific Railroad, and is traversed for five miles by the location of the Los Angeles and Independence Railroad, which is now being rapidly constructed. This land is abundantly supplied with pure mountain water, for irrigating and domestic purposes, by means of a large ditch, extending from the San Gabriel river along the base of the mountain and down the Western and Southern boundary, from which the entire tract can be easily irrigated—rendering it practicable to produce abundant crops of grain, tobacco, melons, potatoes and vegetables of all kinds—planted at all seasons of the year. This fact was clearly demonstrated by the heavy frost early in last April, which visited localities in Los Angeles county with disastrous severity, while on locations on this grant of land, similarly situated to a large portion of the entire tract, the young potato and melon plants and the tobacco and tomatoes (here perpetual bearers) were not affected, and the old homestead vineyard and orchard, clothed in their new and well advanced foliage, escaped entirely, while the vineyards in the valleys below turned black from the blighting frost.

TERMS.

Twenty acres of choice cleared land and one good work-horse or mule and water for irrigating and wood and water for domestic purposes, will be let to the head of a family or a single man until the 1st of January, 1876, for one-tenth of all the crops grown on the land. The mild and uniform climate, together with the wide-spreading live oaks, especially reserved for building sites, do away with the necessity of building houses until the rainy season begins, which is about the 1st of December and continuing, at intervals, for three months, but should parties desire to build temporary houses, I will reimburse them for the cost of material when vacated.

TWO THOUSAND ACRES

Of this choice land, which is, by actual demonstration, as well adapted as any in Southern California to the successful culture of the banana, orange, lime, lemon, English walnut, grape and other fruits and vegetables, will be sold at

PUBLIC AUCTION, ON THE 10th DAY OF JANUARY, 1876, IN TRACTS OF 10, 20 and 40 ACRES, AND ON EASY TERMS,

Thus affording persons seeking homes in our delightful county of varied soil and climatic influences, an opportunity of selecting localities for themselves and friends with a practical knowledge of all the surroundings, and in the meantime spend a delightful Summer and Fall at a moderate expense and send their children to a good public school, centrally located.

The adjacent mountains and mesa lands abound in quail, rabbits and other game, and their streams are filled with mountain trout. The thrifty farmers of the neighborhood can supply, at a moderate price, the forage, grain, milk and butter that may be required, and a grist mill, propelled by water-power, now in course of construction on the premises, will soon be completed.

Two years' experience in California has convinced me that the choice, well-watered lands in favorable localities are being sold at prices far inadequate to their intrinsic value, while dry lands that are destitute of irrigating facilities are dear at any price for agricultural purposes, the purchase of which by persons who are ignorant of the facts, blight the hopes and absorb the fortunes of many good men, which has a prejudicial effect on the large immigration now pouring into this favored country from all quarters. Hence it is I make this fair and liberal proposition, so that all who embrace it may not be deceived.

NORMAN C. JONES, Valley View,

—NEAR SAN GABRIEL MISSION,—

LOS ANGELES COUNTY, - - CALIFORNIA.

FARM LANDS

FOR SALE!

IN TRACTS TO SUIT PURCHASERS,

Located in San Luis Obispo County, 24 Miles south of the town of San Luis Obispo.

DANA BROS., - PROPRIETORS.

37,700 ACRES OF CHOICE LAND.

VALLEY LAND, - -	17,000 Acres.
TIMBER LAND, - - -	3,000 Acres.
HILL, (or Grazing Land) - -	17,700 Acres.

The soil of more than one-half of this large tract is black adobe, the remainder being a sandy loam, suitable for Cereals, Potatoes, Beans, and all kinds of Vegetables.

On the adobe land are more than forty running streams, which never fail. There are also many springs. On any portion of the sandy soil, water can be had by digging to a depth of from fifteen to twenty feet. There is also a large lagoon on the property.

This land has been used chiefly for Stock Raising, there being at present, on the property, about 16,000 Sheep, producing six pounds of Wool, on the average. There are also about 2,500 head of Cattle, and 100 Horses.

The best of crops can be produced here, during the dryest year.

Land ranges in price from $20 to $100 per acre, any portion of which can be purchased on reasonable terms.

H. W. LITTLE. J. T. COCHRAN.

LITTLE & COCHRAN,

—PROPRIETORS OF—

NEW HALL,

MONTEREY STREET,

SAN LUIS OBISPO, - - CAL.

The above Hall is now open for entertainments. It is the largest Hall in the county, is most handsomely decorated, and is furnished with a magnificent Piano. The ventilation is perfect, the seating capacity large, and the seats comfortable. Several Dressing-rooms are conveniently located and fitted.

Traveling People are notified that this is the only Hall in San Luis Obispo having a Stage.

Messrs. Little & Cochran are also proprietors of the PALM SALOON, where the finest

WINES, LIQUORS AND CIGARS

ARE ALWAYS TO BE HAD; ALSO TWO OF THE FINEST

Phelan & Collender Billiard Tables

TO BE FOUND IN THE CITY.

NEWSOM'S

White Sulphur Springs,

SAN LUIS OBISPO CO., CAL.

LOCATED 14 MILES SOUTH OF SAN LUIS OBISPO, 12 MILES FROM STEAMER LANDING, AND 2 MILES FROM THE SANTA BARBARA STAGE STATION, ARROYO GRANDE.

THIS WATER IS AN ABSOLUTE SPECIFIC FOR

Neuralgia, Rheumatism, Gout, Female Complaints, all Diseases of the Secretory Organs, Liver Complaint, Sick Headache, Erysipelas, Paralysis, Scrofula, Sore Eyes, Kidney Complaints,

DYSPEPSIA, DISEASES OF THE STOMACH, AND ALL THOSE DISEASES WHICH HAVE THEIR ORIGIN IN THE IMPURITY OF THE BLOOD.

A HOTEL

For the accommodation of visitors, will soon be completed, large enough to comfortably entertain, in connection with the Cottages, one hundred guests, with good camping facilities for an innumerable host.

Mr. Newsom proposes to bring, in a race, sufficient water from the Arroyo Grande Creek to run a Twenty Horse-Power Engine all the year. This water-power he offers to anyone who will establish a manufacturing interest, he to take the value of the land and water interest in stock of the institution.
